meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada ' s automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler ' s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There ' s only one Saturn you should buy. Toyota – enough apologies: "when you mess

up, ' fess up." Possibly Go Wrong. . . Consumer Reports Books Indianapolis Monthly is the Circle City ' s essential chronicle and guide, an indispensable authority on what ' s new and what ' s news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy ' s cultural

landscape. Kiplinger's Personal Finance Elsevier Materials and the Environment: Eco-Informed Material Choice, Second Edition, is the first book devoted solely to the environmental aspects of materials and their selection, production, use and disposal, by one of the world's foremost materials authorities. It explores human dependence on materials and its environmental consequences

and provides perspective, background, methods, and data for thinking about and designing with materials to minimize their environmental impact. Organized into 15 chapters, this new edition looks at the history of our increasing dependence on materials and energy. It explains where materials come from and how they are used in a variety of industries, along with their life cycle and their relationship to energy and

carbon. It also examines controls and economic instruments that hinder the use of engineering materials, considers sustainability from a materials perspective, and highlights the importance of low-carbon power and material efficiency. Furthermore, it discusses the mechanical, thermal, and electrical properties of engineering metals, polymers, ceramics, composites, and natural materials

in relation to environmental issues. The volume includes new chapters on Materials for Low Carbon Power & Material Efficiency, all illustrated by in-text examples and expanded exercises. There are also new case studies showing how the methods discussed in the book can be applied to real-world situations. This book is intended for instructors and students of Engineering, Materials Science and Industrial/Product

Design, as well as for materials engineers and product designers who need to consider the environmental implications of materials in their designs. Introduces methods and tools for thinking about and designing with materials within the context of their role in products and the environmental consequences. Contains numerous case studies showing how the methods discussed in the book can be applied to real-world situations

Includes full-color data sheets for 40 of the most widely used materials, featuring such environmentally relevant information as their annual production and reserves, embodied energy and process energies, carbon footprints, and recycling data. New to this edition: New chapter of Case Studies of Eco-audits illustrating the rapid audit method. New chapter on Materials for Low Carbon Power examines

the consequences for materials supply of a major shift from fossil-fuel based power to power from renewables. New chapter exploring Material Efficiency, or design and management for manufacture to provide the services we need with the least production of materials. Recent news-clips from the world press that help place materials issues into a broader context. are incorporated into all chapters. End-of-chapter

exercises have been greatly expanded. The datasheets of Chapter 15 have been updated and expanded to include natural and man-made fibers.

“ Big Bob ” Bashara put on a respectable face. To his friends in Detroit ’ s affluent suburb of Grosse Pointe, he was a married father of two, Rotary Club President, church usher and soccer dad who organized charity events with his wife, Jane. To his

“ slaves, ” he was “ Master Bob, ” a cocaine-snorting slumlord who operated a sex dungeon and had a submissive girlfriend to do his bidding—and he wanted more slaves to serve him. But Bashara knew he couldn ’ t rule a household of concubines on his income alone. He eyed his wife ’ s sizable retirement account and formulated a murderous plan. This meticulous account tells the complete story of the crime, the nationally watched investigation and trials, and the lives affected. New Car Buying Guide
