Forthcoming Books Chilton's Total Car Care Repair An in-depth history of naval battleship firepower from before World War I to the end of World War II, by America's leading naval analyst. For more than half a century, the big gun was the arbiter of naval power, but it was useless if it could not hit the target fast and hard enough to prevent the enemy doing the same. Because the naval gun platform was itself in motion, finding a "firing solution" was a significant problem exacerbated when gun sizes increased, fighting ranges lengthened, and

seemingly minor issues like wind velocity had to be considered. To speed up the process and eliminate human error, navies sought a reliable mechanical calculation. This heavily illustrated book outlines for the first time in layman's terms the complex subject of fire-control, as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era. Covering the directors, range-finders, and electro-mechanical computers invented to solve the problems, author Norman Friedman explains not only how the technology shaped (and was

---

shaped by) the tactics involved, but also analyzes their effectiveness in battle. His examination of the controversy surrounding Jutland and the relative merits of competing fire-control systems draws surprising conclusions. He also reassesses many other major gun actions, such as the battles between the Royal Navy and the Bismarck, and the U.S. Navy actions in the Solomons and at Surigao Strait. All major navies are covered, and the story concludes at the end of World War II with the impact of radar.

This book chronicles the development and racing career of a car regarded as the ultimate example of the purebred sports car of the 20th century and the epitome of functional beauty and extraordinary performance: the 1952 Mercedes-Benz 300 SL. Taking second place at its 1952 Mille Miglia debut, it went on to win every one of its races that season.

Lotus Europa - Colin Chapman 's mid-engined masterpiece David and Charles

---

Runways and Racers focuses on sports car races held at military installations throughout America in the early 1950s. It was a marriage of convenience for the Sports Car Club of America and the Strategic Air Command, with both parties gaining advantages from the arrangement. The thorn in the side turned out to be a Congressman whose own aspirations exceeded his standing, but who found himself in a position to be able to influence the outcome of events ...

The Monthly Literary Advertiser e-artnow sro

Explores the design development and production of the Lotus Europa, Lotus's first mid-engined road car. It covers the Renault-powered

Series 1 and 2 cars, the Lotus Twin Cam-engined versions, and the Type 47 racing models.

The Regulus missile was a direct outgrowth of World War II. The success of Germany's V-1 buzz bombs and the awesome power of the a-bomb suggested that developing a submarine-launched, nuclear-armed guided missile was an imperative. The Chance-Vought Aircraft Company won the contract for Regulus with a bold proposal. Their missile resembled a pilotless jet aircraft, and during the test phase was equipped with landing gear, allowing the missile to be recovered rather than expended during the tests. Regulus would be radio controlled, either by a chase aircraft or by

---

a nearby ship or submarine, and it could carry a nuclear payload. JATO boosters enabled submarine launch of the Regulus. It would be deployed aboard five submarines. They conducted the nation's first nuclear deterrent patrols off the coast of the Soviet Union in 1959-1964. Originally printed by the U.S. Navy and Chance-Vought, this handbook was restricted. It was declassified and is here reprinted in book form.

Runways & Racers Veloce Publishing

This book covers the background, conception, design, production and aftermath of the iconic Ferrari 288 GTO, including the prototypes, the early production cars, the mainstream production cars in their various specification guises, and the Evolution cars planned for the aborted Group B FIA race series. A comprehensive and

beautifully illustrated look at a unique sports car.

---

installation. Other projects introduce the reader to the unique PT Cruiser lifestyle that's sweeping the nation.

Popular Science Pen and Sword

"The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ...

Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained within its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars" -- The Guardian, <https://www.theguardian.com/books/booksblog/2012/apr/10/encyclopedia-britannica-11th-edition>.
