Statistics: Unlocking the Power of Data, 3rd Edition is designed for an introductory statistics course focusing on data analysis with real-world applications. Students use simulation methods to effectively collect, analyze, and interpret data to draw conclusions.

Randomization and bootstrap interval methods introduce the fundamentals of statistical inference, bringing concepts to life through authentically relevant examples. More traditional methods like t-tests, chi-square tests, etc. are introduced after students have developed a strong intuitive understanding of inference through randomization methods. While any popular statistical software package may be used, the authors have created StatKey to perform simulations using data sets and examples from the text. A variety of videos, activities, and a modular chapter on probability are adaptable to many classroom formats and approaches.

Pennsylvania State Reports Containing Cases Decided by the Supreme Court of Pennsylvania Princeton Review

Stampp's classic work offers a revisionist explanation for the radical failure to achieve equality for blacks, and of the effect that Conservative rule had on the subsequent development of the South. Refuting former schools of thought, Stampp challenges the notions that slavery was somehow just a benign aspect of Southern culture, and how the failures during the reconstruction period created a ripple effect that is still seen today. Praise for *The Era of Reconstruction*: ". . . This "brief political history of reconstruction" by a well-known Civil War authority is a thoughtful and detailed study of the reconstruction era and the distorted legends still clinging to it."—Kirkus Reviews "It is to be hoped that this work reaches a large audience, especially among people of influence, and will thus help to dispel some of the myths about Reconstructions that hamper efforts in the civil rights field to this day."—Albert Castel, Western Michigan University *Hearings* Vintage
