When he goes to spend the summer with his great-aunt in the family's old house, eleven-year-old Drew is drawn eighty years into the past to trade places with his great-great-uncle who is dying of diphtheria. Reprint.

**Success as an Online Student** Jones & Bartlett Publishers

"An engrossing exposé of scientific practice in America." —KIRKUS REVIEWS From the authors of the New York Times bestselling *Plague of Corruption* comes the prescription on how to end the plague infecting our medical community. *Ending Plague* continues the New York Times bestselling team of Dr. Judy A. Mikovits and Kent Heckenlively with legendary scientist, Dr. Francis W. Ruscetti joining the conversation. Dr. Ruscetti is credited as one of the founding fathers of human retrovirology. In 1980, Dr. Ruscetti's

team isolated the first pathogenic human retrovirus, HTLV-1. Ruscetti would eventually go on to work for thirty-eight years at the National Cancer Institute. Dr. Ruscetti was deeply involved in performing some of the most critical HIV-AIDS research in the 1980s, pioneered discoveries in understanding the workings of the human immune system in the 1990s, isolating a new family of mouse leukemia viruses linked to chronic diseases in 2009, and offers his insights into the recent COVID-19 pandemic. In 1991, Ruscetti received the Distinguished Service Award from the National Institutes of Health. Dr. Ruscetti offers a true insider's portrait of nearly four decades at the center of public health. His insights into the successes and failures of government science will be eye-opening to the general public. You will read never-before-revealed information about the personalities and arguments which have been kept from view behind the iron curtain of public health. Can we say our scientists are protecting us, or is another agenda at work? For most of his decades at the National Cancer Institute, Dr. Ruscetti has been in almost daily contact with his long-time collaborator, Dr. Mikovits, and their rich intellectual discussions will greatly add to our national discussion. Science involves a rigorous search for truth, and you will come to understand how science scholars are relentless in their quest for answers.

Manuals N. America, Incorporated Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem. *WALNECK'S CLASSIC CYCLE TRADER, FEBRUARY 1993* Causey Enterprises, LLC Help Your Church Find their Identity and Become the Hands and Feet of Christ. *Cycle World Magazine* Random House Books for Young Readers

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness

and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
