The construction of buildings is learnt through experience and the inheritance of a tradition in forming buildings over several thousand years. Successful construction learns from this experience which becomes embodied in principles of application. Though materials and techniques change, various elements have to perform the same function. 'Principles of Element Design' identifies all the relevant elements and then breaks these elements down into all their basic constituents, making it possible for students to fully understand the given theory and principles behind each part. As all building projects are subject to guidance through the Building Regulations and British Standards, this book gives an immediate reference back to relevant information to help practitioners and contractors identify key documents needed. Yvonne Dean B.A. (Hons) B.A (Open) RIBA, an architect, energy consultant and materials technologist. She also has 15 years experience as a lecturer, travels widely and is a guest lecturer at many universities. She pioneered an access course for Women into Architecture and Building, which has been used as a template by others, and has been instrumental in helping to change the teaching of technology for architects and designers. Peter Rich AA Dipl. (Hons) Architect, started his career with 14 years experience as a qualified architectural technician. He then joined the AA School of Architecture, working with Bill Allen and John Bickerdike after his graduation, later becoming a partner of Bickerdike Allen Rich and Partners. He also taught building construction at the Bartlett School of Architecture, University College London, and architectural design at the Polytechnic of North London. He now acts as a Consultant.

'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography. Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A. Asian American women have long dealt with charges of betrayal within and beyond their communities. Images of their "disloyalty" pervade American culture, from the daughter who is branded a traitor to family for adopting American ways, to the war bride who immigrates in defiance of her countrymen, to a figure such as Yoko Ono, accused of breaking up the Beatles with her "seduction" of John Lennon. Leslie Bow here explores how representations of females transgressing the social order play out in literature by Asian American women. Questions of ethnic belonging, sexuality, identification, and political allegiance are among the issues raised by such writers

as Jeanne Wakatsuki Houston, Bharati Mukherjee, Jade Snow Wong, Amy Tan, Sky Lee, Le Ly Hayslip, Wendy Law-Yone, Fiona Cheong, and Nellie Wong. Beginning with the notion that feminist and Asian American identity are mutually exclusive, Bow analyzes how women serve as boundary markers between ethnic or national collectives in order to reveal the male-based nature of social cohesion. In exploring the relationship between femininity and citizenship, liberal feminism and American racial discourse, and women's domestic abuse and human rights, the author suggests that Asian American women not only mediate sexuality's construction as a determiner of loyalty but also manipulate that construction as a tool of political persuasion in their writing. The language of betrayal, she argues, offers a potent rhetorical means of signaling how belonging is policed by individuals and by the state. Bow's bold analysis exposes the stakes behind maintaining ethnic, feminist, and national alliances, particularly for women who claim multiple loyalties.

Orphaned at a young age, Erith Lock has a cruel upbringing at the hands of a harsh stepmother. At the tender age of sixteen, a ruthless act leaves her shattered, struggling for survival. When all she has is her word, she makes a solemn vow to three small children. But circumstances drastically change, and the promise could take years to fulfill. She fears it might be better broken. When her past must be confronted, Erith finds herself facing unbearable choices that resound with adversity and might cost her everything. Enduring self-doubt pushes Erith to her breaking point. Will she allow hope and kindness to guide her, or will it be safer to remain captive in the grip of her unfortunate past?

The Promise

Examines the English ode as it was written during the period extending from the middle of the seventeenth century to the middle of the nineteenth century and considers the development of the form and uses to which it was put by writers who varied considerably in outlook, inspiration, and ability in order to present a history of the English ode, to consider the special values of the form, and to weigh the effect ode writing had upon the prosody of lyric verse.

This paper discusses commodity prices might serve as a useful leading indicator of inflation, based on the relative importance of flexible auction markets for the determination of these prices. They thus may have a tendency to respond relatively quickly, especially in response to monetary disturbances. Estimation of alternative commodity-price

indexes, in which the weights are chosen so as to minimize the residual variance in aggregate inflation regressions, was not fully successful. The commodity prices do have a useful role to play as an aid in predicting inflation, so long as one is careful to interpret the relationships qualitatively and in the context of more general macroeconomic developments. The ratio of consumer to commodity price movements' changes over time, and the relative price of commodities undergoes long sustained swings; nonetheless, the qualitative linkages are quite evident in the data. Perhaps most importantly, turning points in commodity-price inflation frequently precede turning points in consumer-price inflation for the large industrial countries as a group.

Darwin's Armada

Each year, millions of Americans will suffer from brain trauma caused by a head injury, stroke or brain surgery. The victim, as well as their family and friends, are left in the dark as to what is happening, what they can expect in the future, and what techniques can aid in the recovery of the person. Brain Trauma and a Road to Recovery: There Is Hope details the path from a near-death experience leaving the victim in a coma, coming out of the coma mentally, physically, and emotionally disabled, facially deformed, and details the struggles and techniques used during the eight-year road to recovery.

The English Ode from Milton to Keats

Darwin's Armadatells the stories of Charles Darwin, Thomas Huxley, Joseph Hooker and Alfred Wallace, four young amateur naturalists from Britain who voyaged to the southern hemisphere during the first half of the nineteenth century in search of adventure and scientific fame. It charts their thrilling voyages to the strange and beautiful lands of the southern hemisphere that reshaped the young mariners' scientific ideas and led them, on returning to Britain, to befriend fellow voyager Charles Darwin. All three crucially influenced the publication and reception of his Origin of Species in 1859, one of the formative texts of the modern world. For the first time the Darwinian revolution of ideas is seen as a genuinely collective enterprise and one that had its birth in a series of gripping and human travel adventures. Many of the most urgent ecological and social issues of our times are seen to be prefigured in this compelling story of intellectual discovery.
