The paleontologist and professor of anatomy who co-discovered Tiktaalik, the "fish with hands," tells a "compelling scientific adventure story that will change forever how you understand what it means to be human" (Oliver Sacks). By examining fossils and DNA, he shows us that our hands actually resemble fish fins, our heads are organized like long-extinct jawless fish, and major parts of our genomes look and function like those of worms and bacteria. Your Inner Fish makes us look at ourselves and our world in an illuminating new light. This is science writing at its finest—enlightening, accessible and told with irresistible enthusiasm.

Exploring some of the ways in which repair practices and perceptions of brokenness vary culturally, Repair, Brokenness, Breakthrough argues that repair is both a process and also a consequence which is sought out—an attempt to extend the life of things as well as an answer to failures, gaps, wrongdoings, and leftovers. This volume develops an open-ended combination of empirical and theoretical questions including: What does it mean to claim that something is broken? At what point is something broken repairable? What are the social relationships that take place around repair? And how much tolerance for failure do our societies have?
