These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank.

Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. *Architects Data* is primarily a handbook of building types rather

than of construction techniques and details.

However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

If you think you need a boarding pass to fly, you're really missing out! Today, drones are everywhere. From film studios to farms, they're in the hands of photographers, commercial surveyors, and racers alike. This fully illustrated book explains how drones developed, where they're going, and which one you should choose. It even includes complete instructions to build both a simple drone and a super-fast FPV racer yourself. Whether you're flying indoors or out, buying or building, this book covers everything: Understand the Jargon: Flying has a lot of unfamiliar terminology, but this book will make it easy to master. Business or Pleasure: Every type of multicopter you might want is introduced, including explanations of which is best suited for what role. Get the Best Pictures: This edition includes an extended guide to the tech and composition tricks you can use to make your pictures stand out of the pack. Get the Best Video: A new shot-guide shows you how to get the most engaging aerial video, whatever your drone. Be an FPV Racer: There are complete step-by-step

instructions for building your own FPV racer, or a surprisingly cheap wooden drone – both great projects. This is an Extended Second Edition. Following from the worldwide success of the first edition, which has been translated into numerous languages, this edition is not just fully updated to keep pace with the laws and the technology (including gesture controls), it is also new enough to thoroughly cover the fast-growing new sport of FPV drone racing, while still including a comprehensive guide to learning to fly any drone.
