What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The *Gendered Motorcycle* answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers

new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

THE SUNDAY TIMES BESTSELLER

'A unique and thoughtful musical memoir' Observer 'Gritty coming-of-age story . . . plenty of anecdotes to keep us hooked, and his memories of Joy Division's Ian Curtis are poignant' Daily Mirror Before he was responsible for some of the most iconic drumming in popular music, Stephen Morris grew up in 1960s and '70s industrial Macclesfield, on a quiet road that led seemingly to nowhere. Far removed from the bright lights and manic energy of nearby Manchester, he felt stifled by suburbia and feared he might never escape. Then he joined Joy Division - while they were still known as Warsaw - a pioneer of the

---

rousing post-punk sound that would revolutionise twentieth-century rock. Following two landmark albums and widespread critical acclaim, Joy Division were at the height of their powers and poised to break the US, when lead singer, Ian Curtis, committed suicide. Part memoir, part scrapbook and part aural history: Stephen Morris's innate sense of rhythm and verve pulses through Record Play Pause. From recollections of growing up in the North West to the founding of New Order, Morris never strays far from the music. And by turns profound and wry, this book subverts the mythology and allows us to understand music's power to define who we are and what we become.

MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-

barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alavaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

The Tyre Michael O'Mara Books  
Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even

---

explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

*How to Build a Motorcycle* leads you through all the key stages - from initially finding the right project for your skill level, to sourcing a base bike and safely taking on some full-on bike-building tasks. With clear, easy-to-follow instructions, proper advice and specially commissioned step-by-step illustrations throughout it is an ideal aid to getting your hands oily. Written by Gary Inman, the co-founder of independent motorcycle magazine Sideburn, and illustrated by Adi Gilbert who is best known for his bicycle and motorcycle drawings whose clients include Harley-Davidson, Guy Martin, Wired magazine, Sideburn magazine and Nike, this is a must-have for all motorcycle lovers. Read this book, even dip in and out where relevant. If it makes sense, schedule some time, clear your mind, pull on some old clothes, grab your toolbox and get going. The chapters in *How to Build a Motorcycle* will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Even though these require relatively little work, they'll transform the look of your bike, and completing them will fill you with confidence to undertake the more difficult jobs, such as fitting more modern front forks or even making your own frame. The book comes with a glossy 32-page section on finished bikes and is a reference and the perfect gift for all fans, from those who merely like to tinker, to riders taking

on a full build.

Richardson et al provide the student of chemical engineering with full worked solutions to the problems posed in Chemical Engineering Volume 2 "Particle Technology and Separation Processes" 5th Edition, and Chemical Engineering Volume 3 "Chemical and Biochemical Reactors & Process Control" 3rd Edition. Whilst the main volumes contains illustrative worked examples throughout the text, this book contains answers to the more challenging questions posed at the end of each chapter of the main texts. These questions are of both a standard and non-standard nature, and so will prove to be of interest to both academic staff teaching courses in this area and to the keen student. Chemical engineers in industry who are looking for a standard solution to a real-life problem will also find the book of considerable interest. \* Contains fully worked solutions to the problems posed in Chemical Engineering Volumes 2 and 3 \* Enables the reader to get the maximum benefit from using Volumes 2 and 3 \* An extremely effective method of learning

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

Ian Hutchinson – ‘Hutchy’ to his many thousands of fans – is a motorcycle racer like few others. A road racer to the core, he has enjoyed spectacular success, notably at the Isle of Man TT, but his own story goes far beyond even those triumphs. In the summer of 2010, Hutchy set the record for most wins in a single TT festival – five in all – having already won the Supersport class at the North West 200 in Northern Ireland. Then disaster struck. At a British Supersport round at Silverstone in September that year, he crashed heavily and was struck by another rider’s machine, breaking his left leg so badly that at one stage it was feared it might have to be amputated. After many surgical operations and a long period of recovery, he fractured the same leg in 2012 while practising exhibition-riding for a motorcycle show. Yet not even these disasters

could keep the Yorkshireman from racing. After modifications to the rear-brake and gear levers on his race machines, he went out and won the 2013 Macau Grand Prix. Two years later saw an even more staggering return to form, when he secured three wins, a second and a third place at the 2015 Isle of Man TT, also winning the Joey Dunlop TT Championship Trophy for that year. And 2016 was to prove even better. Honest, brave and quirkily amusing, Hutchy: Miracle Man presents Hutchy’s own accounts and opinions with those of various celebrated figures from the world of motorcycle racing. It is a book not only for fans of road racing, but for anyone interested in the life and career of a brilliant rider and an extraordinarily brave and enduring man, justly popular not just for his achievements, but for his unassuming modesty, kindness and humour.

#### Twist of the Wrist Motorbooks

This best-selling book is also “#1 book in motorcycle safety” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and

---

specifically keeping the rider's safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider's braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers

riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

This book investigates the ways in which soft power is used by African countries to help drive global influence. Selecting four of the countries most associated with soft power across the continent, this book delves into the currencies of soft power across the region: from South Africa's progressive constitution and expanding multinational corporations, to Nigeria's Nollywood film industry and Technical Aid Corps (TAC) scheme, Kenya's sport diplomacy, fashion and tourism industries, and finally Egypt's Pan-Arabism and its reputation as the cradle of civilisation. The book asks how soft power is wielded by these countries and what constraints and contradictions they encounter. Understandings of soft power have typically been driven by Western scholars, but throughout this book,

Oluwaseun Tella aims to Africanise our understanding of soft power, drawing on prominent African philosophies, including Nigeria's Omolúwàbí, South Africa's Ubuntu, Kenya's Harambee, and Egypt's Pharaonism. It is a largely forgotten fact that Britain was the first industrialized country in the world, but Guy Martin, the cult motorcycle racer and mechanic, is about to remind us how the Industrial Revolution helped make Britain great. Guy shows how the discoveries made in the late 18th to the 19th centuries are to thank for the ease of our every day lives: in order to cook a bacon and egg sandwich in Industrial-era conditions, Guy has to restore a steam locomotive and railway to have the components delivered to the local shop; he has to bring a saw mill back into working order to be able to make a bicycle; he has to revamp a Victorian fishing trawler so he can cook himself some fish and chips; and when he decides to mow the lawn, he restores a Victorian botanical garden. After all that, he's in need of a holiday--so he sets to work restoring a Victorian holiday resort. Illustrated throughout with specially commissioned photography as well as historical images, Guy will take us through each project, his passion, enthusiasm and sheer inventiveness bringing a completely new perspective to the Industrial Revolution. He invites us to live it with him, to enjoy the nostalgia, marvel in the mechanics, and learn from its legacy.

I can't think of anywhere I'd less like to be than in a car. When you're driving a car, you're not taking part, you're a spectator. You're in a can; if it's cold you turn up the heating, if you're hungry you have a wine gum. You might be looking at what's going on, but you're definitely not a part of it. A BIKER'S LIFE is the dramatic, humorous and candid memoir of one of the most recognisable names in motorcycling. Henry Cole's passion for motorbikes began when, at the age of eight, he was first introduced to a 'man cave'. His great-uncle Redbeard's corrugated iron shed was 'stuffed to the gills with old motorbikes' which Henry helped rebuild and ride. Since then, Henry's life can be charted through the bikes and journeys he has been on - from a stifling public-school education, via many years battling addiction, to the big-sky iconic routes Henry has ridden for over twenty series as presenter of numerous TV shows. This book reminds millions of motorcyclists why their bike gives them the freedom to be exactly who they want to be: to say 'I'm doing my thing.' When you ride a motorbike you become part of a worldwide community of kindred spirits - those of us who will not be pacified by driving a car, but instead live for adventure, escape and the sheer thrill of the throttle.

Anniversary Edition, Every Model Since 1921, written by respected motorcycle expert Ian Falloon, offers enthusiasts a thorough review of Guzzi's storied 100-year history via all of its production models. The oldest European motorcycle manufacturer in continuous production, Italy's Moto Guzzi has built some of the most iconic motorcycles ever produced. Established in 1921, the company is one of the most traditional motorcycle makers and also one of the most innovative. Carlo Guzzi's first engine design, a horizontal single, defined Moto Guzzi's road-going motorcycles for the company's first 45 years. In the 1950s, Moto Guzzi experienced tremendous success in Grand Prix motorcycle racing. Today, Moto Guzzi has a higher profile than ever, thanks to its popularity among enthusiast celebrities like Ewan McGregor. This new edition of *The Complete Book of Moto Guzzi* includes a 100th anniversary introduction, new photography, and additional pages to cover the newest models from 2018 to 2020. All of Moto Guzzi's production models are covered in detail, including the groundbreaking Falcone, the V-8 Grand Prix racers, the V7 Sport, the Ambassador, the Eldorado, the Le Mans, the Daytona, right up to today's the complete range of modern bikes including the V7, Griso, Stelvio, and V9. Celebrate a century of iconic Moto Guzzi machines, model by stunning model.
