The automotive industry
underwent great change in the
1960s and the early 1970s.
The continuing trend toward
market consolidation, the
proliferation of sizes and
nameplates, and the "need for
speed" characterized this

period, loosely labeled as the (interior and exterior), paint muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions

color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.
