the conditions and nursing interventions for health conditions affecting children, adolescents and their families. Emphasizing research and evidence-based practice, it organizes material by body system instead of developmental stage, allowing faculty to teach pediatrics in integrated courses/short courses without redundancy. This edition includes a new chapter on genetic and genomic influences, more emphasis on culturally competent care, and new features that emphasize clinical reasoning and health promotion. Designed to help students bridge the gap between classroom and clinical situations, the book emphasizes health promotion and maintenance, growth and development, and family-centered care. 0133937410 / 9780133937411 Principles of Pediatric Nursing: Caring for Children Plus MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0132111756 / 9780132111751 Principles of Pediatric Nursing: Caring for 0133930882 / 9780133930887 MyNursingLab with Pearson eText -- Access Card -- for Principles of Pediatric Nursing: Caring for Children Study Guide for Foundations of Nursing Createspace Independent Publishing Platform "For intermediate courses in economics." provides students with a basic understanding of complex patients and the ability to provide nursing care across a variety of settings by using a series of reality-based, self-paced, self-contained modules that focus on multiple system problems frequently encountered in working with high acuity patients. Using a "nuts and bolts" approach, it addresses essentials by using examples, analogies, and metaphors; focuses on concepts and principles that can be applied across practice settings and patient populations; and includes nursing diagnoses. The modules progress from simple to complex and contain pretests and posttests with answers, learning objectives, glossary, abbreviations, and review questions and answers.
