7th Grade Math Is Easy! So Easy Holt McDougal

How can we increase mathematics achievement among

all students? This book provides a straightforward explanation of how changing mathematics tracking policies to provide algebra instruction to all students by at least eighth grade can bring about changes in both student achievement and teacher performance.

Spielhagen chronicles the success of a large school district that changed the way mathematics was delivered and increased success rates across all populations. Featuring interviews with

students and teachers, the author shows how all stakeholders were brought into the process of changing policy from the ground up. Offering a model for success that can be replicated by other districts, this resource: Provides a comprehensive account of how mathematics policy that evolved in the United States over the last century has resulted in low math literacy among our population. Addresses the recommendations and counterpoints to the report of the National

Mathematics Panel (2009). Includes real-life examples of how stakeholders responded to the policy change that revolutionized mathematics instruction in their district. Frances R. Spielhagen is associate professor of education and director of the Center for Adolescent Research and Development at Mount Saint Mary College, Newburgh, New York. Humanity provides ultimate answers for our society and beyond. Ever wonder if there could ever be a way to end crime and war forever, or the prospects for immortality, or a better educational system, or the reality of extraterrestrial intelligence, or the future of religion? If all the above can be satisfactorily resolved, then, just in case there is no afterlife, where is the best place to live on Earth today? Simple solutions, of course, are hardly that. How to end	crime? What about three strikes and you're dead! Sure this should work, but it's not morally rational. The solution to war is incredibly simple. Just read the book and find out how. Scientists are getting very close to determining a way to disarm our aging gene. When will this happen? Our educational system is flawed. Be prepared to be shocked by the Stanford Marshmallow Study. Finally! A teacher speaks out. After 15 years in the New York City public school system, she reveals to the world the REAL reason so many of our students do poorly in school. From the thought-provoking pages of I'm Your Teacher Not Your Mother... "If children are to improve in schools, we must focus on the most influential branch of the educational tree." "Students in a class receive the same instruction, yet certain ones pass, some even do extremely well, while others fail horribly year

after year. What's the difference?" THE FACTS: In America... * Each year 1.2 million students drop out of school. * 7,000 students drop out of school each day. Something MUST be done to break this destructive cycle! If your child is failing in school, You MUST read this book. If you feel your child can do better in school, You MUST read this book. If you've ever wondered, "what's wrong with our educational system?" You MUST read this book. Find out the REAL reason so many of our students are failing. And learn the 3 simply solutions.
