How can we increase mathematics achievement among all students? This book provides a straightforward explanation of how changing mathematics tracking policies to provide algebra instruction to all students by at least eighth grade can bring about changes in both student achievement and teacher performance. Spielhagen chronicles the success of a large school district that changed the way mathematics was delivered and increased success rates across all populations. Featuring interviews with students and teachers, the author shows how all stakeholders were brought into the process of changing policy from the ground up. Offering a model for success that can be replicated by other districts, this resource: Provides a comprehensive account of how mathematics policy that evolved in the United States over the last century has resulted in low math literacy among our population.Addresses the recommendations and counterpoints to the report of the National Mathematics Panel (2009).Includes real-life examples of how stakeholders responded to the policy change that revolutionized mathematics instruction in their district. Frances R. Spielhagen is associate professor of education and director of the Center for Adolescent Research and Development at Mount Saint Mary College, Newburgh, New York.
“ Offers an ‘ elegant solution ’ to a compelling problem in American society that has global implications: Who should study algebra and when? The best-practices approach should be required reading for pre-service and in-service educators and administrators alike. Readers will recognize that preparing students to learn algebra by 8th grade is as much a right as learning to read. It is a right upon which our future depends. ” —Susan G. Assouline, Professor of School Psychology, Associate Director, The Connie Belin & Jacqueline N. Blank International Center for Gifted Education and Talent Development, The University of Iowa “ Frances Spielhagen ’ s book offers a thoughtful and detailed response to one of the most important questions of our time—should all students take algebra in 8th grade? With impressive and thorough research, the author considers issues of teaching and learning, as well as curriculum and policy. For all those who care about the mathematical future of our nation ’ s children, this book is a must read. ” —Jo Boaler, Professor of Mathematics Education, Stanford University, The School of Education “ In The Algebra Solution to Mathematics Reform, Frances R. Spielhagen shows vividly and precisely how a public school system teaches children to master mathematics skills early—culminating in 8th grade algebra, a critical subject for high school graduation and college admission. Spielhagen ’ s book

precisely demonstrates how to improve real sequential learning for students from the early grades to high school graduation, and successfully into college and life. Thus, this vital book has implications for instruction in all academic subjects, providing a living model for continuity and improvement of student learning. ” —Bruce S. Cooper, Professor, Graduate School of Education, Fordham University

Math, Grade 5 Universal-Publishers

Book 1, SIMPLE SOLUTIONS for Planet Earth, dealt with energy and the environment. SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond. Ever wonder if there could ever be a way to end crime and war forever, or the prospects for immortality, or a better educational system, or the reality of extraterrestrial intelligence, or the future of religion? If all the above can be satisfactorily resolved, then, just in case there is no afterlife, where is the best place to live on Earth today? Simple solutions, of course, are hardly that. How to end crime? What about three strikes and you're dead! Sure this should work, but it's not morally rational. The solution to war is incredibly simple. Just read the book and find out how. Scientists are getting very close to determining a way to disarm our aging gene. When will this happen? Our educational system is flawed. Be prepared to be shocked by the Stanford Marshmallow Study. Then find out that our terrible student scores relative to the developed world might not be worth all the anguish. The USA will prevail because of our superiority in.... Could the solution for world peace or curing cancer be streaming in from space? The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God. How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF? A Golden Evolution is suggested. Are you one of those who largely wasted your life looking out only for yourself, family and friends? Could there be a higher calling? You, too, can make a positive difference. Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity.
