Chris Scott and his band of globetrotting contributors and specialists have put together the definitive manual for planning and undertaking a vehicle-dependent overlanding adventure across the wilds of Africa, Asia and Latin America. The Overlanders' Handbook is written in the same entertaining yet clear

jargon-free English for which Chris's other books are known - it doesn't assume you know your plug gap from a radiator cap. Planning - When to go; typical costs; documentation; sponsorship; early overland journeys. Vehicle choice and preparation - The Overlanders' Handbook is the most comprehensive account in print, covering everything from adapting a cheap car to equipping a campervan or 4x4 for months on the road, or even building and outfitting your own accommodation module to mount on an all-terrain

truck chassis. Life on the road - How to handle dodgy borders, haggle over a purchase, treat a dodgy stomach and cope with crazy driving conditions. Guidance on wild camping; navigation and mapping strategies; onward shipping; advice for solo women overlanders; travelling with children or with pets; vehicle repairs and troubleshooting; and off-road driving techniques. Continental route outlines - Guidelines on both popular and obscure overland routes through Africa, Asia and Latin America. Includes fuel prices, easiest borders and best seasons, visa strategies, danger zones and regional highlights. Overlanders' Tales - Half a dozen accounts of global adventures lasting months or even years - in vans, 4x4s and all-terrain trucks - from contributors aged from 9 to 69. depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGregor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of *Riding Home* and *The Gypsy in Me*. Spirited Ride Penguin UK Covers over 10,000km from the High Atlas to the Mauritanian border, with detailed GPS off-road routes for 4WDs, motorcycles, campervans and mountain bikes.--Bertram. *Race Tech's Motorcycle Suspension*

Bible Simon and Schuster

The suspension expert's illustrated, comprehensive troubleshooting guide for dirt, street, and supermoto—with a solution to virtually any problem. Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces

of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance.
