"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

Microcomputer Busses provides the necessary introduction to the basic features and capabilities of a range of popular commercial busses. Its main objective is to prepare students in solving engineering problems using the concepts and materials featured in the book. The first three chapters introduce the basic concepts and principles such as basic bus and transmission-line concepts, comparative analysis of busses, and the process of how a program can give out hardware responses or operations on a bus. The middle section of the book delves more deeply into the different types of computer busses and into the important features of the operation of each bus. The book supplements and simplifies these features. Lastly, the book concludes by illustrating design examples of existing sample boards that are produced commercially. This book serves as a valuable tool to engineering students. Systems engineers and design engineers can also use this book as reference in designing microcomputer-based systems or in developing system architecture.
