In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple

proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives. The history of hot rodding and performance cars has been well

chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like "back in the day." The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here, longtime hot rodder and industry

veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and an overview of the giant mail-order speed shops of today.

Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has

been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

New York Times Bestseller The Trump administration is remaking the government. It's Even Worse Than You Think: What the Trump Administration Is Doing to America tells us exactly how it is making America worse again. Bestselling author and longtime Trump observer David Cay Johnston shines a light on the political termites who have infested our government under the Trump Administration, destroying it from within and compromising our jobs, safety, finances, and more. No journalist knows Donald Trump better than David Cay Johnston, who has been following him since 1988. It's Even Worse Than You Think: What the Trump Administration Is Doing to America goes inside the administration to show how the federal agencies that touch the lives of all Americans are being undermined. Here is just some of what you will learn: The Wall. Mexican President Enrique Pena Nieto told President Trump that

Mexico will never pay for the border to billionaire heiress Education wall. So, Trump is proposing putting Secretary Betsy DeVos, who has a tariff on Mexican imports. But a tariff will simply raise the price of Mexican goods in the US, meaning American consumers will end up paying for the wall—if it ever gets built. Climate Change. Welcome to the new EPA, run by Scott Pruitt, a lawyer who has spent much of his career trying to destroy the agency he now heads. Secrecy reigns at the new EPA because Pruitt meets with industry executives to find out which clean air and clean water provisions they most want to roll back, and keeps staffers in the dark to make sure these pro-pollution plans don't leak prematurely. Stocking the Swamp. Contrary to his promise to “drain the swamp” in Washington, DC, Trump has filled his cabinet with millionaires and billionaires, from Treasury Secretary Steven Mnuchin, a Goldman Sachs and hedge fund veteran who made much of his fortune foreclosing on homeowners

Secretary Betsy DeVos, who has already put the interests of bankers ahead of debt-burdened students and their families. The Kleptocracy. Under Donald Trump conflict of interest is passé. When Trump isn't in Washington, he stays at one of his properties, where the taxpayers pick up the tab for staffers, Secret Service, and so on, all at full price. And back in Washington, everyone now knows that the Trump International Hotel is the only place to stay if you want to do business with the administration. Meanwhile sons Donald Jr. and Eric run an eyes-wide-open blind trust of Trump holdings to avoid the appearance of conflict of interest—but not the reality.
