Five related stories and a Meditation on the Dragon. This book is a fairy tale for adults. The usual characters appear but the princess approaches her challenges a bit differently. In a time when little girls are again being encouraged to be princesses it behooves women to beware when deciding who is friend and who is foe. *Dance with the Dragon* took fifty years to write. I wrote a new story for each of the baby princesses who came into my life and my heart. No doubt the growth of the princess and her relationship with the dragon reflected my changing understanding of the ways in which women survive in the world.

What's life really like on a fly-in-fly-out (FIFO) mine? In 2012, after touring his comedy shows through Europe, stand-up comedian Xavier Toby was broke and decided to take a job on a remote minesite to pay the bills. In his memoir, *Mining My Own Business*, Xavier Toby is onsite somewhere in Australia working in admin to pay off his credit card debt. Damo, Pando, Jonno, Robbo, Donk, Jokka and Dale are just some of the other blokes earning a crust, attending endless safety briefings, swapping tall tales and 'missing' the missus out there in the middle of nowhere. With Xavier, FIFO is not life on hold - it is life in hilarious overdrive.

The Lost Pirate Baltimore : Published for the World Bank [by] the Johns Hopkins University Press

At the height of her journalism career, more than one million households across the country knew her name and her face. Her reportage on human suffering and triumph captivated viewers, and with it Vanessa Govender shot to fame as one of the first female Indian television news reporters in South Africa. Always chasing the human angle of any news story, Govender made a name for herself by highlighting stories that included the grief of a mother clutching a packet filled with the fragments of the broken bones of her children after they'd been hacked to death by their own father, and another story where she

celebrated the feisty spirit of a little girl who was dying of old age, while holding onto dreams that would never be realised. Yet Govender, a champion for society's downtrodden, was hiding a shocking story of her own. In *Beaten But Not Broken*, she finally opens up about her deepest secret - one that so nearly ended her career in broadcast journalism before it had barely kicked off. She was a rookie reporter at the SABC in 1999. He was a popular radio disc jockey, the darling of the SABC's Lotus FM, a radio station catering to nearly half a million Indian people across South Africa. They were the perfect pair, or so it seemed. And if anyone suspected the nature of the abusive relationship, Govender says, she doesn't believe they knew the full extent of the horror that the popular DJ was inflicting on this intrepid journalist. The bruising punches, the cracking slaps, and the relentless episodes filled with beatings, kicking and strangling were as ferocious as the emotional and verbal abuse he hurled at her. No one would know the brutal and graphic details of Govender's story ... until now. In *Beaten But Not Broken*, this Indian woman does the unthinkable, maybe even the unforgiveable, in breaking the ranks of a close-knit conservative community to speak out about her five-year-long hell in this abusive relationship. Her story also lays bare her heart-breaking experiences as a victim of childhood bullying and being ostracised by some in her community for being a dark-skinned Indian girl. Govender tells a graphic story of extreme abuse, living with the pain, and ultimately of how she was saved by her own relentless fighting spirit to find purpose and love. This is a story of possibilities and hope; it is a story of a true survivor.

Ecology in Transport: Problems and Solutions Lavender Hill Publisher's Services

Selected writings from the author of *Brave New World* and *The Doors of Perception* on the role of psychedelics in society. • Includes letters and lectures by Huxley never published elsewhere. In May 1953 Aldous Huxley took four-tenths of a gram of mescaline. The mystical and transcendent experience that followed set him off on an exploration that was to produce a revolutionary body of work about the inner reaches of the human mind. Huxley was decades ahead of his time in his anticipation of the dangers modern culture was creating through explosive population increase, headlong technological advance, and militant nationalism, and he saw psychedelics as the greatest means at our disposal to "remind adults that the real world is very different from the misshapen universe they have created for themselves by means of their culture-conditioned prejudices." Much of Huxley's writings following his 1953 mescaline experiment can be seen as his attempt to reveal the power of these substances to awaken a sense of the sacred in people living in a technological society hostile to mystical revelations. Moksha, a Sanskrit word meaning "liberation," is a collection of the prophetic and visionary writings of Aldous Huxley. It includes selections from his acclaimed novels *Brave New World* and *Island*, both of which envision societies centered around the use of psychedelics as stabilizing forces, as well as pieces from *The Doors of Perception* and *Heaven and Hell*, his famous works on consciousness expansion.

This book analyzes how transport influences the ecology of various regions. Integrating perspectives and approaches from around the globe, it examines the use of different types of engines and fuels, and assesses the impact of vehicle design on the environment. The book also addresses the effect of the transport situation in agglomerations on their environmental safety. Various types of environmental impacts are considered, from traditional emissions to noise and vibration. Presenting scientific advances from 7 European countries, the book appeals to experts, teachers and students, as well as to anyone interested in the environmental aspects of the transport industry.

Literacy Plus Fortress Press

In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

The triumphant return of a book that gave us permission to throw out the rulebook, in activities ranging from play to architecture to revolution. When this book first appeared in 1972, it was part of the spirit that would define a new architecture and design era—a new way of thinking ready to move beyond the purist doctrines and formal models of modernism. Charles Jencks and Nathan Silver's book was a manifesto for a generation that took pleasure in doing things ad hoc, using materials at hand to solve real-world problems. The implications were subversive. Turned-off citizens of the 1970s immediately adopted the book as a DIY guide. The word "ad hocism" entered the vocabulary, the concept of ad hocism became part of the designer's toolkit, and Ad hocism became a cult classic. Now Ad hocism is available again, with new texts by Jencks and Silver reflecting on the past forty years of ad hocism and new illustrations demonstrating ad hocism's continuing relevance. Ad hocism has always been around. (Think Robinson Crusoe, making a raft and then a shelter from the wreck of his ship.) As a design principle, ad hocism starts with everyday improvisations: a bottle as a candleholder, a dictionary as a doorstop, a tractor seat on wheels as a dining room chair. But it is also an undeveloped force within the way we approach almost every activity, from play to architecture to city planning to political revolution. Engagingly written, filled with pictures and examples from areas as diverse as auto mechanics and biology, Ad hocism urges us to pay less attention to the rulebook and more to the real principle of how we actually do things. It declares that problems are not necessarily solved in a genius's "eureka!" moment but by trial and error, adjustment and readjustment.

From viral comedy sensation James Veitch (as seen on TED, Conan, and *The Tonight Show* with Jimmy Fallon) comes a collection of laugh-out-loud funny exchanges with email scammers. The Nigerian prince eager to fork over his inheritance, the family friend stranded unexpectedly in Norway, the lonely Russian beauty looking for love . . . they spam our inboxes with their hapless pleas for help, money, and your social security number. In *Dot Con*, Veitch finally answers the question: what would happen if you replied? Suspicious emails pop up in our inboxes and our first instinct is to delete unopened. But what if you responded to the deposed princess begging for money in your Gmail? Veitch dives into the underbelly of our absurd email scam culture, playing the scammers at their own game, and these are the surprising, bizarre, and hilarious results.
