The book introduces the reader to the concepts of Scientific Molding and Scientific Processing for Injection Molding, geared towards developing a robust, repeatable, and reproducible (3Rs) molding process. The effects of polymer morphology, thermal transitions, drying, and rheology on the injection molding process are explained in detail. The development of a robust molding process is broken down into two sections and is described as the Cosmetic Process and the Dimensional Process. Scientific molding

procedures to establish a 3R process are provided. The concept of Design of Experiments (DOEs) for and in injection molding is explained, providing an insight into the cosmetic and dimensional process windows. A plan to release qualified molds into production with troubleshooting tips is also provided. Topics that impact a robust process such as the use of regrind, mold cooling, and venting are also described. Readers will be able to utilize the knowledge gained from the book in their day-to-day operations immediately. The second edition includes a completely new chapter on Quality Concepts, as well as much additional material throughout the book, covering fountain flow, factors affecting post mold shrinkage, and factor selections for DOEs. There are also further explanations on several topics, such as in-mold rheology curves, cavity imbalances, intensification ratios, gate seal studies, holding time optimization of hot runner molds, valve gated molds, and parts with large gates. A troubleshooting guide for common molded defects is also provided.

This is one of the most significant military

books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

This collection of essays--the first of its kind in English--brings together the work of an international group of scholars examining the entire tradition associated with the ancient Cynics. The essays give a history of the movement as well as a state-of-the-art account of the literary, philosophical and cultural significance of Cynicism from

antiquity to the present. Arguably the most original and influential branch of the Socratic tradition, Cynicism has become the focus of renewed scholarly interest in recent years, thanks to the work of Sloterdijk, Foucault, and Bakhtin, among others. The contributors to this volume--classicists, comparatists, and philosophers--draw on a variety of methodologies to explore the ethical, social and cultural practices inspired by the Cynics. The volume also includes an introduction, appendices, and an annotated bibliography, making it a valuable resource for a broad audience.

At the height of her journalism career, more than one million households across the country knew her name and her face. Her reportage on human suffering and triumph captivated viewers, and with it Vanessa Govender shot to fame as one of the first female Indian television news reporters in South Africa. Always chasing the human angle of any news story, Govender made a name for herself by highlighting stories that included the grief of a mother clutching a packet filled with the fragments of the broken bones of her children after they'd been hacked to death by their own father, and another story

where she celebrated the feisty spirit of a little girl who was dying of old age, while holding onto dreams that would never be realised. Yet Govender, a champion for society's downtrodden, was hiding a shocking story of her own. In *Beaten But Not Broken*, she finally opens up about her deepest secret - one that so nearly ended her career in broadcast journalism before it had barely kicked off. She was a rookie reporter at the SABC in 1999. He was a popular radio disc jockey, the darling of the SABC's Lotus FM, a radio station catering to nearly half a million Indian people across South Africa. They were the perfect pair, or so it seemed. And if anyone suspected the nature of the abusive relationship, Govender says, she doesn't believe they knew the full extent of the horror that the popular DJ was inflicting on this intrepid journalist. The bruising punches, the cracking slaps, and the relentless episodes filled with beatings, kicking and strangling were as ferocious as the emotional and verbal abuse he hurled at her. No one would know the brutal and graphic details of Govender's story ... until now. In *Beaten But Not Broken*, this Indian woman does the unthinkable, maybe even the unforgiveable, in breaking the ranks of a close-knit conservative community to speak out about her five-year-long hell in this abusive relationship. Her story also lays bare her heart-

breaking experiences as a victim of childhood bullying and being ostracised by some in her community for being a dark-skinned Indian girl. Govender tells a graphic story of extreme abuse, living with the pain, and ultimately of how she was saved by her own relentless fighting spirit to find purpose and love. This is a story of possibilities and hope; it is a story of a true survivor.

In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists

are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

International terrorism and the development of weapons of mass destruction have given war an unlimited capability that can cause total destruction of all living things as well as the world in which we reside. Although human beings realize that this catastrophic outcome is possible, they continue to engage in wars. What forces drive them to do so? *Sounds: A Pathway to World Peace* attempts to answer that question by examining the survival and socializing forces that govern human interactions, identifying the behaviors these forces initiate, and reviewing the circumstances that strengthen the influence of one force over the other. This information is used to develop *The Behavior Set Theory*. This theory is used to explain why wars exist and to provide approaches combatants can take to stop the Arab-Israeli conflict, the war in Iraq, international terrorism, and conditions existing in the United States, where many public policies strengthen survival forces rather than socializing ones.
