A puddle of water on a highway changed Dinesh Palipana's life forever. Halfway through medical school, Dinesh was involved in a catastrophic car accident that caused a cervical spinal cord injury. After his accident, his strength and determination saw him return to complete medical school - now with quadriplegia. Dinesh was the first quadriplegic medical intern in Queensland, and the second person with quadriplegia to graduate medical school in Australia. Despite all of the pain and hardship he's faced, Dinesh now sees his accident as a turning point for the better in his life. He believes it has made him a better doctor, with a better grasp of the concerns and fears of his patients, and a more sensitive, open human. He fights for equal and equitable access for disabled people, and is a compassionate and skilled doctor working in one of Australia's busiest hospitals. After everything he's been through, Dinesh believes he is now happier, stronger and more capable than he was before the accident. It helped him to clarify what is important in his life, and taught him that happiness and strength can always be found within. Praise for Stronger: 'Dinesh's spirit of positivity and his love of life is astonishing. Thoughtful, powerful and moving, Stronger is an exemplar of resilience' - Dr Richard Harris 'Dinesh Palipana is an incredible leader who has challenged the limits of mindset and belief. His contribution to Australia will be felt for generations.' - Kurt Fearnley

More and more Americans today are paying attention to how their cars are designed. Auto designers are now celebrities, and the look of your car has become as important as the clothes you wear. According to

the New York Times Magazine, You are what you drive. Your car is a bold statement of individual identity. American Car Design Now is the first book to take a critical look at this phenomenon, with in-depth examinations of the creative process behind more than thirty contemporary models that embody the trends of the future, including the Crossfire, Mondeo, Thunderbird, Continental, Mark 9, Bengal, Vizon, Cien, and CTS. The product of more than three years of research, this volume collects the author's essays and interviews with the design directors of General Motors, Ford, and Chrysler. The author gained unprecedented access to the notoriously secretive and guarded design studios of these car giants, and the result is an insider's perspective on the making of new American cars, of new American dreams.

American Car Design Now delves deeply into the individual characters behind the industry and shows how their different creative and managerial techniques translate to the finished models. With this unique analytical approach, American Car Design Now is a great addition to the shelves of not only auto industry professionals but designers and car enthusiasts of all types.

"In Amsterdam, four bodies, violently butchered, are discovered in a canal house, the remains of friends and confidantes of the assassin known only as Louis. The men responsible for the murders are Serbian war criminals. They believe they can escape retribution by retreating to their homeland. They are wrong. For Louis has come to Europe to hunt them down: five killers to be found and punished before they can vanish into thin air. There is just one problem. The sixth"--

Autonomous vehicles, despite their relatively short history, have already found practical application in many areas of human activity. Such vehicles are usually replacing people in performing tasks that require long operating time and are held in inaccessible or hazardous environments. Nevertheless, autonomous robotics is probably the area that is being developed the most because of the great demand for such devices in different areas of our lives. This book is a collection of experiences shared by scientists from different parts of the world doing researches and daily exploiting autonomous systems. Giving this book in the hands of the reader, we hope that it will be a treasure trove of knowledge and inspiration for further research in the field of autonomous vehicles.
