Ad \$ Summary Vikas Publishing House Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle

manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is

filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be

upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives -

and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

The report discusses how

economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries. The analysis indicate that: the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars; company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies, and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives; CO2 differentiated taxes can

provide incentives to consumers to purchase CO2 efficient cars; targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases; transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars.

“ Marked by [McDermid ’ s] trademark stunners, including a climax that packs a vicious punch. And readers are again left to marvel at her ingenuity. ”
—Jay Strafford, Richmond Times-Dispatch From one of the finest crime writers we have, The Vanishing Point kicks off with a nightmare scenario—the abduction of a child in an international airport. Stephanie Harker is in the screening booth at airport security, separated from Jimmy Higgins, the five-year-old boy she ’ s in the process of adopting, when a

man in a TSA uniform leads the boy away. The more Stephanie sounds the alarm, the more the security agents suspect her, and the further away the kidnapper gets. It soon becomes apparent that nothing in this situation is clear-cut. For starters, Jimmy ’ s birth mother was a celebrity—living in a world where conspiracy and obfuscation are excused for the sake of column inches. And then there are the bad boys in both women ’ s pasts. As FBI agent Vivian McKuras and Scotland Yard Detective Nick Nicolaides investigate on both sides of the pond, Stephanie learns just how

deep a parent ’ s fear can reach. And the horrifying reality is that she has good reason to be afraid—for reasons she never saw coming. “ [McDermid ’ s] work is taut, psychologically complex and so gripping that it puts your life on hold. ” —The Times (London)
