Learn how to rebuild and upgrade your Buick Nailhead with the first book ever dedicated to the subject! In this all-new book from Nailhead racer and veteran engine builder Gary Weldon, you will learn everything you need to know about how to rebuild and upgrade the venerable Buick Nailhead engine. Weldon takes you through each step, including a review of the birth of the Nailhead, the benefits of its unique design, serial and casting number information to source and identify the best project, and a history of the engine in development. Also covered are the processes of rebuilding, including disassembly, inspection, sourcing the best parts, making critical upgrades, reassembly, and break-in. Of course, all the machine shop work is covered, and practical advice on building engines for competition is provided. The Nailhead was a throwback to the early overhead-valve engine design, and that unique design makes it a popular choice for period-correct hot rod projects. In addition, if your torquey Nailhead resides between the fenders of a Buick Special, LeSabre, Invicta, Roadmaster, Riviera, Century, Skylark, Wildcat, or Electra 225, this book will help you keep that old beauty on the road.

[Volkswagen History to Hobby](#) Haynes Manuals N. America, Incorporated

[Buick Skylark Owners Workshop Manual](#) Chilton Book Company

Vintage U.S.-made cars on the streets of Havana provide a common representation of Cuba. Journalist Richard Schweid, who traveled throughout the island to research the story of motor vehicles in Cuba today and yesterday, gets behind the wheel and behind the stereotype in this colorful chronicle of cars, buses, and trucks. In his captivating, sometimes gritty, voice, Schweid blends previously untapped historical sources with his personal experiences, spinning a car-centered history of life on the island over the past century. Packard, Studebaker, Edsel, De Soto: cars long extinct in the United States can be seen at work every day on Cuba's streets. Havana and Santiago de Cuba today are home to some 60,000 North American cars, all dating back to at least 1959, the year the Cuban Revolution prevailed. Though hardly a new part has arrived in Cuba since 1960, the cars are still on the road, held together with mechanical ingenuity and willpower. Visiting car mechanics, tracking down records in dusty archives, and talking with car-crazy Cubans of all types, Schweid juxtaposes historic moments (Fidel Castro riding to the Bay of Pigs in an Oldsmobile) with the quotidian (a weary mother's two-cent bus ride home after a long day) and composes a rich, engaging picture of the Cuban people and their history. The narrative is complemented by fifty-two historic black-and-white photographs and eight color photographs by contemporary Cuban photographer Adalberto Roque.
