It's never too late. Whether you're a new Christian or you've walked the road for decades, it's never too late to find the critical truths that make life make sense. We often start out believing that common sense will be enough, that we're prepared for the road ahead with our good values and quick thinking. It doesn't take long to learn otherwise. A broken friendship. An obsessive career. Financial

distress. Even empty success. We come back to God, searching for insight, for hope. And He provides. Nothing can replace studying the Bible. Punk rock culture in a preeminently average town Synonymous with American mediocrity, Peoria was fertile ground for the boredom- and anger-fueled fury of punk rock. Jonathan Wright and Dawson Barrett explore

the do-it-yourself scene built by Peoria punks, performers, and scenesters in the 1980s and 1990s. From fanzines to indie record shops to renting the VFW hall for an all-ages show, Peoria's punk culture reflected the movement elsewhere, but the city's conservatism and industrial decline offered a richer-than-usual target environment for rebellion. Eyewitness accounts take readers into hangouts and long-lost venues, while interviews with the people who were there trace the ever-changing scene and varied fortunes of local legends like Caustic Defiance, Dollface, and Planes Mistaken for Stars. What emerges is a sympathetic portrait of a youth culture in search of entertainment but just as hungry for community—the shared sense of otherness that, even for one night only, could unite outsiders and discontents under the banner of music. A raucous look at a small-city underground, Punks in Peoria takes readers off the beaten track to reveal the punk rock life as lived in Anytown, U.S.A.

This book examines the

health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process.

Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.
