In the fifth novel in Ira Nayman ' s Multiverse series (aka the Transdimensional Authority series, which is misleading because book four in the series was mostly about the Time Agency – honestly, if you blinked, you would have missed the appearance of the Transdimensional Authority, and if you didn ' t blink, well, Elsewhen Press accepts no responsibility for the cost of the surgery to rehydrate your eyes), we once again follow the intricate web of events that

unfold in a Transdimensional Authority investigation (oh! – so we could have stayed with the other series name after all – it ’ s not easy keeping track when these sentences can be the size of a Sherman tank!). Why would someone, apparently chosen at random, have their consciousness swapped with someone else in another reality? How would someone, apparently chosen at random, have their consciousness swapped with someone else in another reality? Why would another three persons, apparently chosen at random, have their consciousness swapped with three other someone elses in another reality? Why would the entire bridge crew of a starship, apparently... well, you get the picture. What will happen to all these very confused people? How does the Alternate Reality News Service get scoops on these events so quickly? Why are their reporters acting so dodgy

– do they have something to hide, or just issues? Who are the Pops, and can they help? Does the editor know what ’ s going on, and if she does would she even tell Noomi (our favourite TA investigator)? What was that noise from her office when Noomi was ‘ interviewing ’ her? Why am I asking you these questions when you haven ’ t even read the story yet? Or have you? Why are you reading this blurb if you ’ ve already read the story? Are you looking for an alternate reality, or just alternative facts? This is fiction you know, we tell it like it is. If you want alternative facts you better try a news service...or a politician. Oh, and if you ’ re looking for a news service, you could always consider the Alternate Reality News Service.

the United States Elsewhen Press

An advanced reference documenting, in detail, every step of a real System-in-Package (SiP) design flow Written by an engineer at the leading edge of SiP design and implementation, this book demonstrates how to design SiPs using Mentor EE Flow. Key topics covered include wire bonding, die stacks, cavity, flip chip and RDL (redistribution layer), Embedded Passive, RF design, concurrent design, Xtreme design, 3D real-time DRC (design rule checking), and SiP manufacture. Extensively illustrated throughout, System in Package Design and Simulation covers an array of issues of vital concern for SiP design and fabrication electronics engineers, as well as SiP users, including: Cavity and sanded dies design FlipChip and RDL design Routing and coppering 3D Real-Time DRC check SiP

simulation technology Mentor SiP Design and Simulation Platform Designed to function equally well as a reference, tutorial, and self-study, System in Package Design and Simulation is an indispensable working resource for every SiP designer, especially those who use Mentor design tools.

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

Ford Pick-Ups and Expedition Lincoln
Navigator Automotive Repair Manual
Fundamentals of Automotive

Technology: Principles and Practice
covers crucial material for career and
technical education, secondary/post-
secondary, and community college
students and provides both rationales
and step-by-step instructions for
virtually every non-diagnosis NATEF
task. Each section provides a
comprehensive overview of a key topic
area, with real-life problem scenarios
that encourage students to develop
connections between different skill and
knowledge components. Customer
service, safety, and math, science, and
literary principles are demonstrated
throughout the text to build student
skill levels. Chapters are linked via
cross-reference tools that support skill
retention, critical thinking, and problem-

solving. Students are regularly reminded that people skills are as important as technical skills in customer service fields.
