Locked in a desperate Cold War race against the Soviets to find out if humans could survive in space and live through a free fall from space vehicles, the Pentagon gave civilian adventurer Nick Piantanida's Project Strato-Jump little notice until May Day, 1966. Operating in the shadows of well-funded, high-visibility Air Force and Navy projects, the former truck driver and pet store owner set a new world record for manned balloon altitude. Rising more than 23 miles over the South Dakota prairie, Piantanida nearly perished trying to set the world record for the highest free fall parachute jump from that height. On his next attempt, he would not be so lucky. Part

harrowing adventure story, part space history, part psychological portrait of an extraordinary risk-taker, this story fascinates and intrigues the armchair adventurer in all of us.

An advanced reference documenting, in detail, every step of a real System-in-Package (SiP) design flow Written by an engineer at the leading edge of SiP design and implementation, this book

demonstrates how to design SiPs using Mentor EE Flow. Key topics covered include wire bonding, die stacks, cavity, flip chip and RDL (redistribution layer), Embedded Passive, RF design, concurrent design, Xtreme design, 3D real-time DRC (design rule checking), and SiP manufacture. Extensively illustrated throughout, System in Package Design and Simulation covers an array of issues of vital concern for SiP design and fabrication electronics engineers, as well as SiP users, including: Cavity and sacked dies design FlipChip and RDL design Routing and coppering 3D Real-Time DRC check SiP simulation technology Mentor SiP Design and Simulation Platform Designed to function equally well as a reference, tutorial, and self-study, System in Package Design and Simulation is an indispensable working resource for every SiP designer, especially those who use Mentor design tools.

In the fifth novel in Ira Nayman's Multiverse series (aka the Transdimensional Authority series, which is misleading because book four in the series was mostly about the Time Agency – honestly, if you blinked, you would have missed the appearance of the Transdimensional Authority, and if you didn't blink, well, Elsewhen Press accepts no

responsibility for the cost of the surgery to rehydrate your eyes), we once again follow the intricate web of events that unfold in a Transdimensional Authority investigation (oh! – so we could have stayed with the other series name after all – it's not easy keeping track when these sentences can be the size of a Sherman tank!). Why would someone, apparently chosen at random, have their consciousness swapped with someone else in another reality? How would someone, apparently chosen at random, have their consciousness swapped with someone else in another reality? Why would another three persons, apparently chosen at random, have their consciousness swapped with three other someone elses in another reality? Why would the entire bridge crew of a starship, apparently... well, you get the picture. What will happen to all these very confused people? How does the Alternate Reality News Service get scoops on these events so quickly? Why are their reporters acting so dodgy – do they have something to hide, or just issues? Who are the Pops, and can they help? Does the editor know what's going on, and if she does would she even tell Noomi (our favourite TA investigator)? What was that noise from her office when Noomi was 'interviewing' her? Why am I asking you these questions when you haven't even read the story yet? Or have you? Why are you reading this blurb if you've already read the story? Are you looking for an alternate reality, or just alternative facts? This is fiction you know, we tell it like it is. If you want alternative facts you better try a news service...or a politician. Oh, and if you're looking for a news service, you could always consider the Alternate Reality News Service. *The American Catalog*
