What is Vintage Innovation? Vintage Innovation redefines innovation not as "new and flashy" but as "better and different." It isn't a rejection of new approaches or cutting-edge technology so much as an embrace of the old and the new. It's the overlap of the "tried and true" and the "never tried." It's a mash-up of low-fi tech and new tech. It's the idea of finding relevance by looking back and looking forward. It's a focus on timeless skills in new contexts. It's the idea that innovation happens when teachers take a both/and approach as they empower their students in the present to prepare them for an uncertain future. If you are a teacher, you are an innovator. You are the experimenter trying new strategies. You are the architect designing new learning opportunities. Apps change. Gadgets break. Technology grows obsolete. But one thing remains: teachers change the world. And one way to do this is through a vintage innovation approach. With vintage innovation, teachers ask: How do I innovate when I don't have the best technology? How can I use vintage tools, ideas, and approaches in new ways? How can I use constraints to spark creativity? How do I blend together the "tried and true" with the "never tried?"

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Kerry McCauley has the job most pilots only dream of; delivering small used aircraft to locations around the world. In his 30 years an international ferry pilot, Kerry has delivered almost every kind of airplane you can name to almost every location you can think of. In his long career Kerry battled fuel system malfunctions over the Atlantic, a total electrical failure at night over the Sahara, getting lost over Africa and being struck by lightning off the coast of Portugal. Kerry's almost insatiable, reckless quest for danger and adventure also led to putting international smuggler and bank robber on his resume. Kerry found the answer to the question "what could possibly go wrong?" time and time again. But his skill, ingenuity and luck were what allowed him to survive the countless mishaps, catastrophes and close calls including a nearly fatal plane crash. While "Ferry Pilot" is an account of one man's crazy thirst for thrills and adventure, his coming to grips with the dangerous nature of his career and just how much he wants to test the depth of his luck bag. It's also a portrait of the perseverance and bravery of a devoted family man

who lost many close friends and his first wife to the dangerous skies.

The treatment of American Indians is discussed historically with reference to the 4 principal methods used to create or perpetuate false impressions: obliteration, defamation, disembodiment, and disparagement. Indian contributions to American civilization are cited in contrast with historical references to Indians in textbooks. The author suggests specific reading materials for various age levels which reflect accurately the cultural contributions of the Indian. A bibliography on the American Indian influence on American civilization is appended. (Jh).

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.

Alcohol and nicotine addiction mostly occur together. Over the last ten years therapeutic aspects and motivational strategies have been considerably improved. Hence, groups and subgroups have been defined and can be treated with specific medication and tailor-made psychotherapies, leading in the long term to considerably better and more effective results than the once broadly applied, rigorous abstinence -based therapies. However, alcohol and nicotine addiction still represent major medical and social problems. In this book, new therapeutic approaches are comprehensively described, outlining the different interactions between personality, environment and the effects of the substance. In addition to prevention-based therapies and diagnosis, essential psychological and sociological strategies, as well as medication-based therapies, are also presented in detail. All of these therapies have realistic aims and are of global validity. In addition, the book provides a broad overview of the American and European epidemiology of alcohol and nicotine addictions. The book is written for all those who care for and offer professional therapy for alcohol and nicotine-addicted patients.
