This volume is the offspring of a week-long workshop on "Galois groups over  $\mathbb{Q}$  and related topics," which was held at the Mathematical Sciences Research Institute during the week March 23-27, 1987. The organizing committee consisted of Kenneth Ribet (chairman), Yasutaka Ihara, and Jean-Pierre Serre. The conference focused on three principal themes: 1. Extensions of  $\mathbb{Q}$  with finite simple Galois groups. 2. Galois actions on fundamental groups, nilpotent extensions of  $\mathbb{Q}$  arising from Fermat curves, and the interplay between Gauss sums and cyclotomic units. 3. Representations of  $\text{Gal}(\mathbb{Q}/\mathbb{Q})$  with values in  $\text{GL}(2, \mathbb{C})$  deformations and connections with modular forms. Here is a summary of the conference program: • G. Anderson: "Gauss sums, circular units and the simplex" • G. Anderson and Y. Ihara: "Galois actions on  $\mathbb{Z}^n$  ( • • • ) and higher circular units" • D. Blasius: "Maass forms and Galois representations" • P. Deligne: "Galois action on  $\mathbb{Z}^n$  ( $\mathbb{P}^1 - \{0, 1, \infty\}$ ) and Hodge analogue" • W. Feit: "Some Galois

The Student Edition ensures student comprehension by providing features that improve reading and writing skills. Chapters open with Concept Review (activate prior knowledge), Key Concept (set the chapter focus), and Why the Concept Matters (relevance). Pre-reading support in each section provides clearly stated objectives, key terms with page citations as to where they are defined, and note-taking graphic organizer. Math Handbook in the reference section teaches mathematical skills related to economics. Economics Skillbuilders provide chapter-specific skill applications, such as evaluating sources and synthesizing economic data. The Economics Skillbuilder Handbook teaches skills for understanding economics and using sources. - Publisher.

### Changing Times Dundurn

The electric vehicle offers many promises--increasing U.S. energy security by reducing petroleum dependence, contributing to climate-change initiatives by decreasing greenhouse gas (GHG) emissions, stimulating long-term economic growth through the development of new technologies and industries, and improving public health by improving local air quality. There are, however, substantial technical, social, and economic barriers to widespread adoption of electric vehicles, including vehicle cost, small driving range, long charging times, and the need for a charging infrastructure. In addition, people are unfamiliar with electric vehicles, are uncertain about their costs and benefits, and have diverse needs that current electric vehicles might not meet. Although a person might derive some personal benefits from ownership, the costs of achieving the social benefits, such as reduced GHG emissions, are borne largely by the people who purchase the vehicles. Given the recognized barriers to electric-vehicle adoption, Congress asked the Department of Energy (DOE) to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure. As a result of the request, the National Research Council (NRC)--a part of the National

Academies--appointed the Committee on Overcoming Barriers to Electric-Vehicle Deployment. This committee documented their findings in two reports--a short interim report focused on near-term options, and a final comprehensive report. Overcoming Barriers to Electric-Vehicle Deployment fulfills the request for the short interim report that addresses specifically the following issues: infrastructure needs for electric vehicles, barriers to deploying the infrastructure, and possible roles of the federal government in overcoming the barriers. This report also includes an initial discussion of the pros and cons of the possible roles. This interim report does not address the committee's full statement of task and does not offer any recommendations because the committee is still in its early stages of data-gathering. The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014. Overcoming Barriers to Electric-Vehicle Deployment focuses on the light-duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug-in electric vehicles (PEVs), which include battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs). The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid. BEVs differ from PHEVs because they operate solely on electricity stored in a battery (that is, there is no other power source); PHEVs have internal combustion engines that can supplement the electric power train. Although this report considers PEVs generally, the committee recognizes that there are fundamental differences between PHEVs and BEVs.

Why make statistics harder than it has to be?

Lind/Marchal/Mason: STATISTICAL TECHNIQUES IN BUSINESS AND ECONOMICS, 11/e is a perennial market best seller due to its comprehensive coverage of statistical tools and methods delivered in a student friendly, step-by-step format. The text is non-threatening and presents concepts clearly and succinctly with a conversational writing style. All statistical concepts are illustrated with solved applied examples immediately upon introduction. Modern computing tools and applications are introduced, but the text maintains a focus on presenting statistics content as oppose to technology or programming methods, and the eleventh edition continues as a 'students' text with increased emphasis on interpretation of data and results. A collection of finalists of the Taco Kuiper Award for Investigative Reporting, this book illustrates the revival of hard-hitting investigative reporting in South Africa and

highlights its important role. These exposés range from government corruption and white collar crime to environmental and social issues. With a comprehensive discussion on the state of South African journalism, these stories were originally published by the country's most reputable newspapers and make no qualms about covering the controversial: the horrors of Zimbabwe prisons, shifty politicians, and shoot-to-kill policemen.
