This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other

things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

The evolution of the automotive transmission has changed rapidly in the last decade, partly due to the advantages of highly sophisticated electronic controls. This evolution has resulted in modern automatic transmissions that offer more control, stability, and convenience to the driver. *Electronic Transmission Controls* contains 68 technical papers from SAE and other international organizations written since 1995 on this rapidly growing area of automotive electronics. This book breaks down the topic into two sections. The section on Stepped Transmissions covers recent developments in regular and 4-wheel drive transmissions from major auto manufacturers including DaimlerChrysler, General Motors, Toyota, Honda, and Ford. Technology covered in this section includes: smooth shift control; automatic transmission efficiency; mechatronic systems; fuel saving technologies; shift control using information from vehicle navigation systems; and fuzzy logic control. The section on Continuously Variable Transmissions presents papers that demonstrate that CVTs offer better efficiency than conventional transmissions. Technologies covered in this section include: powertrain control; fuel consumption improvement; development of a 2-way clutch system; internal combustion engines with CVTs in passenger cars; control and shift strategies; and CVT application to hybrid powertrains. The book concludes with a chapter on the future of electronic transmissions in automobiles.

Don "The Snake" Prudhomme reveals for the first

time ever his incredible life and career on and off of the drag strip.

Imagine spending a year with Don "The Snake" Prudhomme, having coffee together and talking about his life, his racing, his friends, and his family. He'd tell you about how he rose from being a high school drop-out who was painting cars to a respected Top Fuel dragster driver and successful businessman. You'd hear how he toured the country with Tommy Ivo and "The Hawaiian" Roland Leong, racing all the legends from "Big Daddy" Don Garlits to "The Golden Greek" [Chris] Karamesines. He'd say how he met Tom McEwen and recall how they became the Snake and the Mongoose, leading to a career in Funny Cars that netted him four championships in a row. He'd talk about the thrill of first wins and owning his own teams but also the struggles of bad seasons, crashes and fires, broken parts, and broken contracts. Along the way, he'd speak about the people in his life, such as engine-builder Keith Black and NHRA president Wally Parks, and those who were killed in the wild and unpredictable sport of nitro racing. It wouldn't be only racing, though. Prudhomme would share lessons he learned about business and life from such varied sources as a neighbor in Granada Hills to Ford GT40 driver Dan Gurney. He also would talk about the importance of family: how his wife, Lynn, and daughter, Donna, changed his world and how finding out about his African-American roots opened his eyes to a culture and inheritance he'd always wanted. This is the experience you'll get in Don "The Snake" Prudhomme: My Life Beyond the 1320.

A HILARIOUS COMPILATION OF THE WORST JOB APPLICATIONS IMAGINABLE - A PERFECT STOCKING FILLER OR OFFICE SECRET SANTA GIFT THIS CHRISTMAS. Ever read a truly terrible job application? Or perhaps slightly exaggerated the truth on one of your own... We've all been there - but these are worse. So much worse. From overly-honest cover letters, embarrassing typos, and mortifying personal revelations, to awkward interview questions, misplaced self-confidence, and, of course, outright lies. This hilarious collection of shockingly dreadful job applications, crap CVs and excruciating interviews will have you laughing out loud, while also making you feel so much better about yourself - because at least you weren't ever this bad . . . Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. The Interview: Q. Is there anything about this job that you feel you might not be very good at? A. Dealing with people. Q. What person, living or dead, would you most like to meet? A. The living one.

Making Cars Go Faster Penguin

From the bestselling author of My Ex-Best Friend's Wedding comes a novel about four friends who share a passion for a beloved British television show that will change all of their lives. When the concierge of The Alexander, a historic Atlanta apartment building, invites his fellow residents to join him for weekly screenings of Downton Abbey, four very different people find themselves connecting with the addictive drama, and—even more unexpectedly—with each other... Samantha Davis married young and for the wrong reason: the security of old Atlanta money—for herself and for her orphaned brother and sister. She never expected her marriage to be complicated by love and compromised by a shattering family betrayal. Claire Walker is now an empty nester and struggling author who left her home in the suburbs for the old world charm of The Alexander, and for a new and productive life. But she soon wonders if clinging to old dreams can be more destructive than having no dreams at all. And then there's Brooke MacKenzie, a woman in constant battle with her faithless ex-husband. She's just starting to realize that it's time to take a deep breath and come to terms with the fact that her life is not the fairy tale she thought it would be. For Samantha, Claire, Brooke—and Edward, who arranges the weekly gatherings—it will be a season of surprises as they forge a bond that will sustain them through some of life's hardest moments—all of it reflected in the unfolding drama, comedy, and convergent lives of Downton Abbey.

Young couples gather to participate in an annual 'chainsaw party', cutting down trees for firewood in anticipation of the winter. A group of men spend a weekend in the wilderness where they grew up, and where some still find themselves trapped. An ageing environmentalist takes out his frustration and anger on a singular, unsuspecting target. A woman helps another get revenge against a man whose crime extends to an entire community. In these ten stories, Nickolas Butler demonstrates his talent for portraying a place and its people with unparalleled tenderness, evoking an American landscape that will be instantly recognizable to readers enchanted by his debut novel, Shotgun Lovesongs.

Modifying and Tuning Fiat/Lancia Twin-cam Engines Penguin UK

An advanced level introductory book covering fundamental aspects, design and dynamics of electric and hybrid electric vehicles. There is significant demand for an understanding of the fundamentals, technologies, and design of electric and hybrid electric vehicles and their components from researchers, engineers, and graduate students. Although there is a good body of work in the literature, there is still a great need for electric and hybrid vehicle teaching materials. **Electric and Hybrid Vehicles: Technologies, Modeling and Control - A Mechatronic Approach** is based on the authors' current research in vehicle systems and will include chapters on vehicle propulsion systems, the fundamentals of vehicle dynamics, EV and HEV technologies, chassis systems, steering control systems, and state, parameter and force estimations. The book is highly illustrated, and examples will be given throughout the book based on real applications and challenges in the automotive industry. Designed to help a new generation of engineers needing to master the principles of and further advances in hybrid vehicle technology. Includes examples of real applications and challenges in the automotive industry with problems and solutions. Takes a mechatronics approach to the study of electric and hybrid electric vehicles, appealing to mechanical and electrical engineering interests. Responds to the increase in demand of universities offering courses in newer electric vehicle technologies.

By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. *Go Like Hell* tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could

beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Working with and for Ancestors examines collaborative partnerships that have developed around the study and care of Indigenous ancestral human remains. In the interest of reconciliation, museums and research institutions around the world have begun to actively seek input and direction from Indigenous descendants in establishing collections care and research policies. However, true collaboration is difficult, time-consuming, and sometimes awkward. By presenting examples of projects involving ancestral remains that are successfully engaged in collaboration, the book provides encouragement for scientists and descendant communities alike to have open and respectful discussions around the research and care of ancestral human remains. Key themes for discussion include new approaches to the care for ancestors; the development of culturally sensitive museum policies; the emergence of mutually beneficial research partnerships; and emerging issues such as those of intellectual property, digital data, and alternatives to destructive analyses. Critical discussions by leading scholars also identify the remaining challenges in the repatriation process and offer a means to continue moving forward. This volume will appeal to a broad, interdisciplinary audience interested in collaborative research and management strategies that are aimed at developing mutually beneficial relationships between researchers and descendant communities. This includes students and researchers in archaeology, anthropology, museums studies, and Indigenous communities.
