Manual for the Wheeled Vehicle Driver Haynes Manuals N. America, Incorporated

As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam. going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is, in fact, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first time in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must take note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare--the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime. Francis John Kelly Colonel, Armor 1972

Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of On Point: The United States Army in Operation IRAQI FREEDOM. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the

US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

Bengali Language Handbook Bentley Pub

The Center of Military History is pleased to present the second volume in the U.S. Army in Action series, a facsimile reprint of Brigadier General S.L.A. Marshall's Bastogne: The First Eight Days. Originally published in 1946, this brief study provides a combat history of a critical battle during the Allied liberation of Europe in World War II. Outnumbered and surrounded for five days, a U.S. Army combined arms force of airborne infantry, armor, engineers, tank destroyers, and artillery conducted a successful defense of the Belgian crossroads town of Bastogne in late December 1944. They separated the German combined arms formations and destroyed the pieces, halting the offensive. The outcome of this battle was critical to the successful Allied defense against the German Ardennes offensive. Bastogne offers unique insights, capturing the immediate impressions of the soldiers who fought in this harsh winter engagement. The author penetrates the "fog of war" with a coherent narrative that clearly captures the strategy, tactics, and leadership of the battle. This action strangled the German logistical flow to their forward assault divisions, disrupting their offensive tempo and slowing their advance. What emerges is a vivid case study of how decisive leadership and incidents of individual heroism can contribute to overcoming enemy forces and weather.
