Over the past 100 years the European Automotive Industry has been repeatedly challenged by best practice. First by the United States, through the development of ‘mass production’ pioneered by Henry Ford and more recently by ‘lean production techniques’ as practised by the leading Japanese producers, particularly Toyota. It has consistently risen to these challenges and has shown it can compete and even outperform its competitors with world-class products. However, the European industry is now faced with growing competition and growth from new emerging low-cost countries and needs to re-define its competitive advantage to remain at the forefront of the sector. Automotive growth is driven by two factors, new markets and new technologies. Global competition is increasing, with technology and product differentiation becoming the most important sales factors, but with continued cost pressure. Within the market the winners will be more profitable and the losers will disappear. The Automotive Industry makes a significant contribution to the socio-economic fabric of the European Union. Manufacturing output represents €700 billion and research and development spending €24 billion. European automotive suppliers number 5000 member companies and represent 5 million employees and

generate €500 billion in revenues. These are significant figures that generate wealth and high value employment within the EU. European firms must consistently improve their competitive position to ensure that the industry does not migrate to growing new markets.

An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “motor” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Eyetracking Web Usability is based on one of the largest studies of eyetracking usability in existence. Best-selling author Jakob Nielsen and coauthor Kara Pernice used rigorous usability methodology and eyetracking technology to analyze 1.5 million instances where users look at Web sites to understand how the human eyes interact with design.

Their findings will help designers, software developers, writers, editors, product managers, and advertisers understand what people see or don't see, when they look, and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye gaze plots and heat maps, Nielsen and Pernice guide the reader through hundreds of examples of eye movements, demonstrating why some designs work and others don't. They also provide valuable advice for page layout, navigation menus, site elements, image selection, and advertising. This book is essential reading for anyone who is serious about doing business on the Web.

"Mark My Words" is a saga about Allan Christopher and his family. Allan is a self-made, African-American multimillionaire approaching sixty. He and his wife Maureen have been married for forty years, and they have eight children and seventeen grandchildren. He was born in Kansas City, Missouri, starting out with nothing but family, very high intelligence, ambition, and drive. Graduating from high school at age sixteen, he worked his way through trade school to become an electrician. He was confronted with discrimination and prejudice, especially in the workplace. In his drive to succeed and refusal to be held down, he opened a fix-it shop in Chicago, and through hard work and determination turned it into a multi-million-dollar electronics corporation. He's "made his mark." For the last twenty-five years, his home has been a thirty-room estate in Evanston, Illinois. He's very articulate, and is among the Who's Who of Black America. His company is among those listed in the Fortune 500. He enjoys fine cars, like his collection of vintage automobiles. His children are educated and successful in their own right. He has contributed greatly to the community, considered to be one of its "movers and shakers." His business and social connections are numerous, and he faithfully attends church on Sundays. But has he made it? With the advent of his sixtieth birthday, his character, his past and his beliefs come into focus, honor and question as his story is told through the eyes of his family... including his four gay children... and with it his impact on their lives. The time is May 1988; the place, Chicago.
