A little later than the Mustang Dodge announced the Charger in the middle of the 1966 season with the top model having a 425bhp 426 Street Hemi motor. Chargers showed well at the NASCAR superspeedways and had a good performance on the street. The first generation, which featured the 440 Magnum engine, was replaced in 1968. Minor cosmetic changes kept the car fresh until reorganization in 1971 brought in a 115-inch wheelbase to minimize weight gain as emissions controls took their toll on power output. By 1974 the Hemi ceased to be an option when all engines were tuned for low-lead gasoline but the Charger remained until 1974 when the name was transferred to a personal luxury line. This is a book of contemporary road and comparison tests, model introductions, technical and specification data, racing, driver's impressions. Models covered include: • 426 Hemi • 440 • 500 • 440 Six-Pack • 440 R/T • Charger SE

**How to Restore the Triumph** Herridge & Sons Limited

Theoretically, the formational and developmental mechanism of Shanzhai Model (the Chintrepreneurship, the China-way of Doing Business) theorized in this text, in addition to complying with the traditionally Western dominated frameworks of risk-taking-oriented, technology-oriented, resource-oriented, and speculation-oriented – also creates the peculiar or updated characteristics, complementary and supplementary to the existing theories of entrepreneurship and strategic management. The peculiar characteristics of Shanzhai Model may be attributed to the government policy guidance, from macroeconomic level, to technology development level, and to market expansion level, through the regulated cycle process of CCP government 'Five-Year-Plan'. Such a dynamic process of government policy system determines the dynamisms of China economy, industry and enterprises, linking the previous weaknesses into the upgrade or rectification of the next five-year-plan, forcing enterprises to obligately upgrade or adjust their business and management operations (given the absolute autocracy of China government). Practically, the imitation-based cost-saving operations on the enterprise level, the 'Wolf Like' clustered industry-chain operations organized by the principle of 'Risks-Resources-Benefits Sharing' on the industry level, and the 'Price-to-Performance' products advantages on the market level – together, they have been contributing to the leapfrog of China economy, by taking advantages of increasingly globalized business environment and the network (Internet) information technology system, turning China into an economic Shanzhai, corruption Shanzhai, and a political Shanzhai, imposing the 'One Belt One Road' hegemonism on the harmony of international community. Is it too late? The contribution of this text material may benefit MBA, Ph.D students in management, and especially benefiting to those corporate executives. Regardless of De-Globalization or De-China campaigns, the flow of business is inevitably and eternally beyond the boundaries of countries one way or another, sooner or later.
