We 're told that the future will be brighter. But what if human happiness really lies in

the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city 's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA 's owner,

world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He 's going to defeat technology 's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold

of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. ' Like Orwell, of whom he has written so brilliantly, Dennis Glover ' s work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our

times. ' —Don Watson ' Savagely hilarious and unlike anything else you ' ll read this year. It boils with the anger of the present moment. ' —Rohan Wilson

With *Viva La Muerte* comes nineteen tales of dark speculative fiction broken into three parts: "Midwest Gothic" which is comprised of stories about ordinary Midwesterners put in extraordinary situations; "The Tragic Lives of the Undead" where the stories explore the human side of

being undead; and "The Other Half of God's Children" - the strange bizarro side of the collection. These tales of wicked wonder pay homage to the hero that will one day save us from the hell that is called life. Long live Death!

BESTSELLER • “As sweet and funny and sad and true and heartfelt a memoir as one could find.” —from the foreword by Augusten Burroughs  
Ever since he was young, John Robison longed to connect with other people, but by the time he was a teenager, his odd habits—an inclination to blurt out non sequiturs, avoid eye contact, dismantle radios, and

dig five-foot holes (and stick his younger brother, Augusten Burroughs, in them)—had earned him the label “social deviant.” It was not until he was forty that he was diagnosed with a form of autism called Asperger’s syndrome. That understanding transformed the way he saw himself—and the world. A born storyteller, Robison has written a moving, darkly funny memoir about a life that has taken him from developing exploding guitars for KISS to building a family of his own. It’s a strange, sly, indelible account—sometimes alien yet always deeply human.

When the mysterious Tatee walks into the renowned Manhattan Tango Studio all hell breaks loose, not a single person stays unaltered: old friendships are challenged and put to the test; seemingly confident women are alarmingly threatened by the novel newcomer's presence; cool sleek men lose their steps, stuttering incomprehensible disobedient words. Unprepared for surreal and outlandish

relationships she takes the role of an intrigued observer witnessing the unfolding drama where the dance floor reveals a theatre of the absurdity of human nature. The other stories explore the profoundness of human psyche where joy, suffering, humour and even madness can all be found. Encounter stories about cult escapees, an incompetent lawyer, a liberated husband, a case of mistaken identity and the serendipitous nature of synchronicity.

Formerly 'Automotive Brake Systems'. 2nd Edition. Safety is very important in vehicle design and operation. Driving-Safety

Systems is the new edition of what was formerly titled 'Automotive Brake Systems'. The title has been changed to reflect the addition of information on recent technological advancements in safety systems beyond braking systems such as traction control systems (TCS) and electronic stability control (ESP). Ideal for engineers, technicians and enthusiasts, this book offers a wide range of detailed and easy-to-understand descriptions of the most important control systems and components. A new section on electronic stability has been added, and sections on driving physics, braking systems basics and braking systems for passenger cars and commercial vehicles

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative

fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced

technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these

promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards. Three to Tango and Other Tales Page Publishing Inc The book focuses on the effects of shock waves on vacancies and their clusters in fcc crystals. It is shown that high-speed cooperative atomic displacements represent a powerful tool for the purposeful modification of defect structures in crystalline bodies. The results are important for radiation material science, nano-engineering, the

study of shock wave effects and the ultrasonic treatment of materials. forming, such as folding based forming, super-plastic, and hydro forming technologies. The first section also explains details of automotive spot welding (welding lobes), arc welding, and adhesive bonding, in addition to flexible fixturing systems and welding robotic cells. Guiding readers through each stage in the process of automotive painting, including the calculations needed to compute the number of applicators and paint consumption based on

vehicle dimensions and demand, along with the final assembly and automotive mechanical fastening strategies, the book's systematic coverage is unique. The second module of the book focuses on the layout strategies of the automotive production line. A discussion of automotive aggregate planning and master production scheduling ensures that the reader is familiar with operational aspects. The book also reviews the energy emissions and expenditures of

automotive production processes and proposes new technical solutions to reduce environmental impact.
