Negotiation is a field of knowledge and endeavor that focuses on gaining the favour of people from whom we want things : prestige,

freedom, money, justice, status, love, security and recognition. 30 weeks on the New York Times Bestsellers List, this book is the result of thirty years of laborious work, interaction and involvement of the author, Herb Cohen, in thousands of negotiations. He aims to illuminate one ' s reality and its opportunities and points out thinking and behaviors, options and alternatives from which one can choose and have a way of getting what one wants. Driving-safety Systems Cartech When the mysterious Tatee walks into the renowned Manhattan Tango Studio all hell breaks loose, not a single person stays unaltered: old friendships are challenged and put to

the test; seemingly confident women are alarmingly threatened by the novel newcomer ' s presence; cool sleek men lose their steps, stuttering incomprehensible disobedient words. Unprepared for surreal and outlandish relationships she takes the role of an intrigued observer witnessing the unfolding drama where the dance floor reveals a theatre of the absurdity of human nature. The other stories explore the profoundness of human psyche where joy, suffering, humour and even madness can all be found. Encounter stories about cult escapees, an incompetent lawyer, a liberated

husband, a case of mistaken identity and the serendipitous nature of synchronicity.

In the Twentieth Century Albert Einstein and others made some astonishing discoveries. They showed us how our universe could start with a Big Bang which seems to allow something to appear from nothing, that Space can be curved and why there may have been a time when there was no Time. If you have always been absolutely baffled by anything related to Space-time then this book is for you. My writing mission is to engage with a new audience that has no previous knowledge of science, and I go to great lengths (without any equations) to make sure that everybody

can fully understand my explanations. Unfortunately, Space-time has a reputation for being difficult. The first thing I will do is show that this claim is false. In this book nothing is too hard to understand and I will also encourage you to participate in the scientific process. Don't worry, you are not going to need your own laboratory; everything can be done in the comfort of your own home with Thought Experiments.

First published in 1997, this hilarious book launched satirist Will Ferguson's career.

Challenging the notion that Canadians are "nice," the book asks, "Do we as Canadians deserve a country so great?" Tackling subjects from Canada's favorite inbred royals to the mighty beaver as national icon, from sex in a canoe to all-Canadian "superhero" Captain Canuck, Ferguson rampages across the cultural landscape. The book also provides a fast-paced, opinionated overview of telling moments in Canadian history, including its run-amok Mounties and "fun-loving days" of the country's (unacknowledged) slave trade.
