Petroleum engineering now has its own true classic handbook that reflects the profession's status as a mature major engineering discipline. Formerly titled the Practical

Petroleum Engineer's Handbook, by Joseph Zaba and W.T. Doherty (editors), this new, completely updated two-volume set is expanded and revised to give petroleum engineers a comprehensive source of industry standards and engineering practices. It is packed with the key, practical information and data that petroleum engineers rely upon daily. The result of a fifteen-year effort, this handbook covers the gamut of oil and gas engineering topics to provide a reliable source of engineering and reference information for analyzing and solving problems. It also reflects the growing role of natural gas in industrial development by integrating natural gas topics throughout both volumes. More than a dozen leading industry experts-academia and industry-contributed to this two-volume set to provide the best, most comprehensive source of petroleum

engineering information available.

The histories of Rome by Sallust, Livy, Tacitus and others shared the desire to demonstrate their practical applications and attempted to define the significance of the empire. Politics and military activity were the central subjects of these histories. Roman historians' claims to telling the truth probably meant they were denying bias rather than conforming to the modern tendency to be objective.

"Featuring dazzling photographs by the renowned yachtsman and photojournalist Gilles Martin-Raget, this stunning tribute captures the original splendor of these fourteen recently restored boats. Readers feel as though they are traversing the globe with the crew as great action photography depicts the palpable excitement on board. From Buzzards Bay, Massachusetts to the Great Barrier Reef, Martin-Raget's striking scenes range from leisurely cruises past the villages of St. Tropez to close encounters between racing yachts during international regattas. Below deck, his images of the boats' impressive interiors offer a peak at the luxury accommodations. Complimenting the photographs, detailed architectural drawings reveal the structures of these fabled vessels."

A Treasury of Old Souls is a collection of engaging stories about Eric Bergeson's lifetime spent amongst a small town's aging population. Even as a young child, Eric found himself in friendships with people in their golden years. In mid-life, he realized that his own perspective on life, death and relationships had been powerfully shaped by these unique friendships. Poignant, funny, yet gently instructional, Treasury is masterfully told in Eric's signature entertaining style as he traces the growth of his love and understanding of the elderly from his first day of kindergarten to recent adventures with his

centenarian great aunt Olive. Treasury is Eric Bergeson's sixth book.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines'

applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons.

The work contains seventeen articles reflecting scholarship in traditional and emerging areas of social psychology. Major topics addressed include the subjective evaluation of emotions; the psychology of values; self-definition; priming and racial stereotyping; selfrepresentation; self-harming; negative communications; visual communication and emotion recognition; comparative studies of values; duration of romantic relationships; interpersonal attraction; social psychological antecedents of burnout; social integration and language effects on bilinguals. "The diverse set of chapters in this unique volume speaks to the question of whether social psychological theories and principles are universal. The authors take the reader on a fascinating tour, highlighting some of the many domains and places in which social psychology has been applied. Some answers are provided, but equally richly many questions are raised. The approaches taken, notably the comparative approach adopted in several of the chapters, will challenge social psychologists to think about both how they conceptualize social problems and how they do and should research them." --Miles

Hewstone, Professor of Social Psychology, University of Oxford "This volume offers a truly panoramic picture of how scientific social psychology can address timely social issues. The editors recruited outstanding scientists spanning eleven nations to produce a collection that is as impressive in its remarkable diversity of nations as well as topics and methods. An ideal reader for a course in methods or social psychology." --Harold Takooshian, Past President, APA division of International Psychology

Attune yourself to everyday Reiki with a revolutionary guide to an at-home practice. "This book will transform you. Brett Bevell teaches us how to shift every aspect of life, from the food and water we put into our bodies to the past, present,

and future."—David Morehouse, PhD, author of *Psychic Warrior*. The Reiki tradition dictates that you must be initiated—or attuned—by a Reiki master before properly practicing this healing art of energy flow. In this revolutionary guide, Reiki Master Brett Bevell breaks with convention and extends the transformative powers of Reiki to all by presenting at-home rituals for self-attunement. In the true healing spirit of Reiki, Bevell encourages creativity and experimentation with the practice, allowing you to personalize Reiki for everyday use. With twenty-one symbols to empower the flow of Reiki, as well as chants for attuning candles, stones, and even the water in your bath or washing machine, this is Reiki as you've never seen it before: available to everyone, for use in all aspects of life, as Reiki was always meant to be.

Latin Historians

On October 15, 1942, Japanese carrier planes attacked and sank the destroyer USS MEREDITH off Guadalcanal Island. When the attack became imminent, the crew of the accompanying tug VIREO was taken aboard MEREDITH. Of the 329 men, only 96 survived. For four days they struggled, combating dehydration, injuries, burns, shark attacks, and strafing by enemy planes. Robert Robinson miraculously survived the sinking of MEREDITH. He served with Medical Officer Barry Friedman, on another destroyer, USS RUSSELL. Lt. Cmdr Robinson died in 2004 after serving in three wars. Dr. Friedman retired after a career as an orthopaedic surgeon and lives in San Diego.

"Although both a thrilling sea adventure and a fascinating historical insight into a little known aspect of the sea battle for Guadalcanal, Dr. Friedman's work is more than just a book, it is a heritage, something of great value that must be passed on to future generations. "The Short Life of a Valiant Ship grants insight into the world of the Tin Can' sailors of the US Navy's destroyer fleet, a group of very average young men from all across America who were lifted out of their peacetime existences to be plunged, half-trained, outnumbered and ill-equipped, into the most cataclysmic naval

campaign in history, and of how they arose triumphant at a terrible price. "The Greatest Generation' is a phrase that has been much bandied about in recent years, but it's not a cliché, it's a simple truth." -James H. Cobb Author of the Amanda Garrett Naval Thrillers; "Choosers of the Slain," "Sea Strike," "Sea Fighter," & "Target Lock" "I enjoyed reading The Short Life of a Valiant Ship very much. The miracle of this nation is that, for over 200 years, generations of Americans have fought and died for the freedoms we all enjoy. It is important to revisit the time when the issue of the war in the Pacific was firmly in doubt and the odds faced by ships like USS MEREDITH were daunting. The manner in which the officers and men of MEREDITH responded to their challenges is inspirational.... A gripping story that is well told!"

-Rear Admiral Peter H. Daly, Assistant Chief Naval Operations for Information, Plans and Strategy
