full-color photos plus easy-to-read comparison charts, graphs, and specifications. New Cars and Trucks 2002 Viking Canada This study chronicles the success of the Japanese car in America. Starting with Japan ' s first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing.

Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle. *Car and Driver* Cartech Popular Science gives our readers the information and tools to improve

International  
"This play tracks the crumbling friendship of two Mexican men from different social classes. Ambivalent about their aspirations and struggling for meaning in their lives, they fistfight and find forgiveness with each other over the familiar territories of love and betrayal. Told in a structure that allows actors to go in and out of character, inviting the audience to share the universality of friendship and survival."--Page 4 of cover.
