China ' s Belt and Road Initiative (BRI) is expected to be the largest infrastructure development scheme of the twenty-first century. There is escalating concern over BRI ' s potential environmental impacts in Southeast Asia, a global biodiversity hotspot and a focus area of BRI development. Case studies of Indonesia, Myanmar, Lao PDR and Malaysia show that the success of BRI in bringing about sustainable growth and opportunities depends on the Chinese government and financiers, as well as the agencies and governments involved when BRI investments take place. The adoption of best environmental practices is critical in ensuring that growth is sustainable and that bad environmental practices are not locked in for decades to come.

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada ' s automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

BIOCALCULUS: CALCULUS, PROBABILITY, AND STATISTICS FOR THE LIFE SCIENCES shows students how calculus relates to biology, with a style that maintains rigor without being overly formal. The text motivates and illustrates the topics of calculus with examples drawn from many areas of biology, including genetics, biomechanics, medicine, pharmacology, physiology, ecology, epidemiology, and evolution, to name a few. Particular attention has been paid to ensuring that all applications of the mathematics are genuine, and references to the primary biological literature for many of these has been provided so that students and instructors can explore the applications in greater depth. Although the focus is on the interface between mathematics and the life sciences, the logical structure of the book is motivated by the mathematical material. Students will come away with a sound knowledge of mathematics, an understanding of the importance of mathematical arguments, and a clear understanding of how these mathematical concepts and techniques are central in the life sciences. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

The Skyway Men have ruled the underworld of the skylands for centuries--killing, stealing and doing whatever it takes of increase their wealth and power. Pistols, money and fear are their weapons of choice. After a decade exiled to a small piece of farmland that flies the quietest windlanes, Kade is thrust back into the world of death, corruption, shady deals and dirty deeds. But it's just like old times. He doesn't know who to trust. He doesn't know who's on which side. He doesn't even know which side he's on any more. All Kade knows for sure is that murder and mayhem aren't what they used to be.

Vascular diseases, particularly atherosclerosis, are the most frequent and critical underlying fatal disorders in the industrialized world. Cardiovascular deaths are the leading cause of death in the Western world. Although cancer or malignant neoplasms recently have topped the list of causes of deaths in Japan, cardiovascular and cerebrovascular diseases bring about more deaths than cancer if they are reclassified into a unified category of diseases of the vascular system. The National Cardiovascular Center was established by the Ministry of Health and Welfare of Japan to combat cardiovascular and cerebrovascular diseases. Since the Center was opened, we have continued to support basic and clinical studies of cardiovascular and cerebrovascular diseases within as well as outside the Center. Clinical studies that we have supported in modern diagnostic and therapeutic measures against cardio- and cerebrovascular diseases have made remarkable advances in recent years, especially in medical imaging technology including CT and MRI, and in interventional measures including balloon angioplasty and other catheter-based treatments. We are proud of the significant improvement in the overall survival rate and the quality of life of patients suffering from vascular disorders. However, there are still many essential difficulties remaining in the diagnosis and treatment of vascular disorders. Such difficulties necessitate further fundamental studies not only from the practical aspect but also from the integrated perspectives of medicine, biology, and engineering.

Horsepower War shatters nostalgic myths about musclecars and provides historical perspective on today's SUV craze. It proves efficiency and pollution regulation didn't kill the musclecar and that current regulation, which picks winners by favoring SUVs is the real threat. Harless has mined auto literature from the 1960s to the present to reveal granular detail on specific models, while at the same time providing broad perspective on the tectonic shifts in domestic auto making. He approaches political issues as an auto enthusiast, but instead of being an apologist for industry, he offers principles that embrace market rationality, and enhance the long-term sustainability of cars through rational transportation and energy policy. Harless re-discovers the principles of "conspicuous waste" and "conspicuous consumption"--phrases coined by economist Thorstein Veblen, author of Theory of the Leisure Class--to unmask the unacknowledged assumptions of both U.S. consumers and automakers. **TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP**
