This guide which was produced in an effort to consolidate and disseminate research information relating to traffic noise and develop guidelines for the abatement of traffic generated noise through highway design procedures and techniques, reviews the nature of noise and presents a systems approach to the attack of noise problems and its interrelated aspects. Some insight is provided into the problems faced by highway planners and designers and remedial measures are presented for noise reduction. Procedures are outlined which aid in conducting noise studies. Design features are described which aid in obtaining attenuation when studies indicate such measures are desirable and feasible. Several procedures for noise measurement are included in an appendix.

The Individuals with Disabilities Education Act (IDEA) of 2004 has placed a renewed emphasis on the importance of the regular classroom, the regular classroom teacher and the general curriculum as the primary focus of special education. This book contains over 100 topics that deal with real issues and concerns regarding the regular classroom and the special education process. These concerns range from requirements for referring a child for an individual evaluation, school discipline, classroom-based assessment, IEP meetings, inclusion and mainstreaming, and various legal requirements relating to IDEA, Section 504 of the Rehabilitation Act of 1973, and the No Child Left Behind

act. It stresses the importance that every child with a disability must have goals "to enable the child to be involved in and make progress in the general education curriculum." Other issues interspersed within this text include classroom needs, the planning of individualized education programs, and participation in all aspects of the general curriculum. In order to achieve these goals, support for the regular classroom teacher must be provided so that children with disabilities can be involved in, and make progress in, the curriculum and participate in nonacademic activities.

**2009 GAAP Guide Level A** CCH  
Staying in the Game picks up where many social skills training programs leave off - with generalization. The book addresses this void by presenting a range of interventions aimed at promoting generalization of social skills by showing how to establish social situations that can be opportunities for generalization. Chapter 1 presents the principles upon which Staying in the Game is based and describes a model to guide efforts to enable successful generalization. Chapters 2 and 3 look at the process of identifying and assessing social opportunities and ensuring success. Chapters 4, 5, 6, and 7 each addresses one type of intervention: group-based work (Chapter 4), interventions by staff and parents (Chapter 5), using peer mentors (Chapter 6), and adapting extracurricular activities (Chapter 7). Chapter 8: Concludes with an overview of how to provide social opportunities. The focus of Staying in the Game goes beyond just placing students in the mainstream, to include taking advantage of inclusion by facilitating the use of typical students to address generalization of social skills - one of the most profound challenges for individuals with autism and other developmental disabilities.
