Staying in the Game picks up where many social skills training programs leave off – with generalization. The book addresses this void by presenting a range of interventions aimed at promoting generalization of social skills by showing how to establish social situations that can be opportunities for generalization. Chapter 1 presents the principles upon which Staying in the Game is based and describes a model to guide efforts to enable successful generalization. Chapters 2 and 3 look at the process of identifying and assessing social opportunities and ensuring success. Chapters 4, 5, 6, and 7 each addresses one type of intervention: group-based work (Chapter 4), interventions by staff and parents (Chapter 5), using peer mentors (Chapter 6), and adapting extracurricular activities (Chapter 7). Chapter 8: Concludes with an overview of how to provide social opportunities. The focus of Staying in the Game goes beyond just placing students in the mainstream, to include taking advantage of inclusion by facilitating the use of typical students to address generalization of social skills – one of the most profound challenges for individuals with autism and other developmental disabilities.

In the last 20 years much work has been done on the influence of brain

and on pharmacological approaches to treating mental and emotional disorders. Partly as a result of this fact, a large proportion of patients who consult psychotherapists are already on medication of some sort. This book presents an overview of psychopharmacology for psychotherapists. It is designed to help them to treat patients in a way that takes into account the effects of the medication, and to recognize when some kind of pharmacological assistance might be useful in treating a disorder.

The Individuals with Disabilities Education Act (IDEA) of 2004 has placed a renewed emphasis on the importance of the regular classroom, the regular classroom teacher and the general curriculum as the primary

focus of special education. This book contains over 100 topics that deal with real issues and concerns regarding the regular classroom and the special education process. These concerns range from requirements for referring a child for an individual evaluation, school discipline, classroom-based assessment, IEP meetings, inclusion and mainstreaming, and various legal requirements relating to IDEA, Section 504 of the Rehabilitation Act of 1973, and the No Child Left Behind act. It stresses the importance that every child with a disability must have goals "to enable the child to be involved in and make progress in the general education curriculum." Other issues interspersed within this text include classroom needs, the planning of individualized education programs, and participation in all aspects of the general curriculum. In order to achieve these goals, support for the regular classroom teacher must be provided so that children with disabilities can be involved in, and make progress in, the curriculum and participate in nonacademic activities.
