The Individuals
with Disabilities

Education Act (IDEA) of 2004 has placed a renewed emphasis on the importance of the regular classroom, the regular classroom teacher and the general curriculum as the primary focus of special education. This book contains over 100 topics that deal with real issues and concerns regarding the regular classroom and the special education process. These concerns range from requirements for referring a child for an individual evaluation, school discipline, classroom-based

assessment, IEP meetings, inclusion and mainstreaming, and various legal requirements relating to IDEA, Section 504 of the Rehabilitation Act of 1973, and the No Child Left Behind act. It stresses the importance that every child with a disability must have goals "to enable the child to be involved in and make progress in the general education curriculum." Other issues interspersed within this text include classroom needs, the planning of individualized education programs, and participation

in all aspects of the general curriculum. In order to achieve these goals, support for the regular classroom teacher must be provided so that children with disabilities can be involved in, and make progress in, the curriculum and participate in nonacademic activities.

Written by military nurses, the Battlefield and Disaster Nursing Pocket Guide is the premier quick reference guide for battlefield nurses on the front lines. This pocket guide contains critical assessment and treatment

information, as well as translation guides to ensure accurate communication in the field. The care of patients with injuries received on the battlefield or in a disaster is specialized. Traumatic injuries may be more complex or unlike injuries seen in the hospital setting. In addition, the battlefield or disaster scene adds an additional level of complexity to medical care. Designed to fit in the pocket of a uniform, this unique pocket guide provides state-of-the-art, evidence-based recommendations for providing nursing care under exceptional conditions. The field guide was designed to fit in the pocket of a field uniform and to stand up to rigorous

field conditions.

This guide which was produced in an effort to consolidate and disseminate research information relating to traffic noise and develop guidelines for the abatement of traffic generated noise through highway design procedures and techniques, reviews the nature of noise and presents a systems approach to the attack of noise problems and its interrelated aspects. Some insight is provided into the problems faced by highway planners and

designers and remedial measures are presented for noise reduction. Procedures are outlined which aid in conducting noise studies. Design features are described which aid in obtaining attenuation when studies indicate such measures are desirable and feasible. Several procedures for noise measurement are included in an appendix.
