By responding to challenges familiar to all American manufacturers with a tough competitive stance and a uniquely people-centered philosophy, Cummins has carved out a distinctive profile in the international industrial landscape. A compelling and important contribution to the literature of business history, The Engine that Could showcases the strategic choices and the pivotal decisions that have shaped and influenced Cummins Engine. Timber Producers Association of Michigan and Wisconsin. Bulletin Springer Science & Business Media Scores of talented and dedicated people serve the forensic science community, performing vitally important

work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
