An updated edition of the “remarkable” New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don’t live in Beverly Hills or on Park Avenue. They live next door. America’s wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop

for used cars, raise children who don’t realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the

*Chilton's Repair  
Manual*

An in-depth, hard-hitting account of the mistakes, miscalculations and myopia that have doomed America’s automobile industry.

In the 1990s,

Detroit’s Big Three automobile

companies were

riding high. The

introduction of the minivan and the SUV

had revitalized the

industry, and it was widely believed that

Detroit had

miraculously

overcome the threat

of foreign imports

and regained its

ascendant position.

As Micheline

Maynard makes

brilliantly clear in

THE END OF

DETROIT, however,

the traditional

American car industry

was, in fact, headed

for disaster. Maynard

argues that by

focusing on high-

profit trucks and

SUVs, the Big Three

missed a golden

opportunity to win

back the American car-

buyer. Foreign

companies like

Toyota and Honda

solidified their

dominance in family

and economy cars,

gained market share

in high-margin luxury

cars, and, in an ironic

twist, soon stormed in

with their own

sophisticatedly

engineered and

marketed SUVs,

pickups and minivans.

Detroit, suffering

from a “good

enough” syndrome

and wedded to

ineffective marketing

and zero-percent  
financing, failed to  
give consumers what  
they really  
wanted—reliability, the  
latest technology and  
good design at a  
reasonable cost.

Drawing on a wide  
range of interviews  
with industry leaders,  
including Toyota's  
Fujio Cho, Nissan's  
Carlos Ghosn,  
Chrysler's Dieter  
Zetsche, BMW's  
Helmut Panke, and  
GM's Robert Lutz, as  
well as car designers,  
engineers, test drivers  
and owners, Maynard  
presents a stark  
picture of the culture  
of arrogance and  
insularity that led  
American car  
manufacturers astray.  
Maynard predicts that,  
by the end of the  
decade, one of the  
American car makers  
will no longer exist in
