Death is a way of life outside of the safety of Inner Tulsa, and Jade means to keep flipping Mother Nature off until old age claims her. With one eye always on the sky, the last thing she needs is a pack of bounty hunters out for her living head. With no idea of why anyone would want her, her wits might keep her free, assuming she can resist the charming lures of Sandro, one of the men out to claim her as his own. Left with the choice of being the evening snack of a tornado or taking shelter with the bounty hunter, she does what she does best: she lives on the edge. Striking a bargain with the handsome bounty hunter buys her another day of life, but it also dumps her into the heart of a sinister plot, one meant to enslave the residents of the storm-tossed city—and the others brave and foolish enough to call the Alley home.

This textbook on homology and cohomology theory is geared towards the beginning graduate student. Singular homology theory is developed systematically, avoiding all unnecessary definitions, terminology, and technical machinery. Wherever possible, the geometric motivation behind various algebraic concepts is emphasized. The only formal prerequisites are knowledge of the basic facts of abelian groups and point set topology. Singular Homology Theory is a continuation of t he author's earlier book, Algebraic Topology: An Introduction, which presents such important supplementary material as the theory of the fundamental group and a thorough discussion of 2-dimensional manifolds. However, this

earlier book is not a prerequisite for understanding Singular Homology Theory.

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

In Psychology, Folklore, Creativity and the Human Dilemma, the author explores the meaning of folklore and its usefulness in education and psychotherapy. The author ' s interest has expanded into other fields that challenge and question the limits of our everyday horizons, namely, into operas, plays, and humor, as well as into new approaches to the meaning of human existence explored by modern thinkers. These various fields often interact, explain, and enrich each other. The book aims for deepening the awareness of our ultimate human concerns, the meaning of authenticity, and the urgent need for radical, long-term commitments. The present volume focuses almost entirely on the role of folklore in expanding and enriching a person ' s horizons, on the challenges by modern writers in terms of the need to radically alter the paradigm of Western society that has brought the blessings of technology, led to a fragmentation of our psyche, and threatens the very essence of our subjectivity. Throughout the book there is both the hidden and the overt implication that simply liking, appreciating or agreeing with insightful ideas and suggestions presented by anyone are absolutely worthless, or may even be counterproductive, if the readers do not translate into changes and actions the ideas that are most meaningful to them, and if they do not do so in their

family, social, political and spiritual life.
