Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the

nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning. The photos in this edition are black and white. The Trans Am and Firebird were distinctly different than their cousin, the Chevy Camaro, and many Trans Am and Firebird models became stand-out muscle cars of their era. Some second-generation Pontiac F-Body cars are affordable while others are extremely rare and valuable. In particular, the 1970-1974 Pontiac Super Duty Trans Ams, 1970-1973
