There are numerous textbooks that explain the theories and principles of psychology, but many are too dry or

academic. *Idiot's Guides: Psychology, 5th Edition* breaks down the complexity of psychology and helps readers understand the how and why of the human mind, the causes of things like mental illness, how we react to situations, and how we become who we are. The book steers clear of self-help and pop psychology and focuses on more of an academic approach. Key concepts are broken down into plain and simple language, and supplemented with insightful illustrations that help explain each concept in a visual format that is fun and engaging. Readers start with the root of the human mind and move into the most popular theories of modern psychology, while exploring the lives and genius (and madness) behind the most famous pioneers in the field, such as Freud and Jung. From behaviorism to social psychology to cognitive psychology, readers will learn what makes all of us tick, and why we are who we are.

“ Jones, a trailblazing African American judge, delivers an urgently needed perspective on American history . . . [A] passionate and informative account ” (Booklist, starred review). *Answering the Call* is an extraordinary eyewitness account from an unsung hero of the battle for racial equality in America—a battle that, far from ending with the great victories of the civil rights era, saw some of its signal achievements in the desegregation fights of the 1970s and its most notable setbacks in the affirmative action debates that continue into the present in Ferguson, Baltimore, and beyond. Judge Nathaniel R. Jones ’ s groundbreaking career was forged in the 1960s: As the first African American assistant US attorney in Ohio; as assistant general counsel of the Kerner

Commission; and, beginning in 1969, as general counsel of the NAACP. In that latter role, Jones coordinated attacks against Northern school segregation—a vital, divisive, and poorly understood chapter in the movement for equality—twice arguing in the pivotal US Supreme Court case *Bradley v. Milliken*, which addressed school desegregation in Detroit. He also led the national response to the attacks against affirmative action, spearheading and arguing many of the signal legal cases of that effort. *Answering the Call* is “ a stunning, inside story of the contemporary struggle for civil rights . . . Essential reading for understanding where we are today—underscoring just how much work is left to be done ” (Vernon E. Jordan Jr., civil rights activist). “ A forthright testimony by a witness to history. ” —Kirkus Reviews

Ted Studebaker, a true peace hero, worked for peace through nonviolence. By doing so, he left a peacemaking legacy that continues to impact mankind through the ages. He was a volunteer agriculturalist in the highlands of Vietnam during the war. As he began his third year of work, he married the love of his life, Pakdy, a Chinese coworker. One week after their marriage, Vietnamese forces, opposing the Americans, entered their house where they killed him. Ted was fully prepared and armed with confidence for the work that God had set before him. He was totally committed to give of

himself without reservation. Ted gratefully acknowledged his government's position of accepting alternative service to serve mankind as opposed to military service. He wrote to his draft board, "I don't feel unpatriotic or disloyal to my country. However, I do think there are certain rights, beliefs, and values to which one should be more devoted to than his country if he has arrived at them through conscientious thought, learning and experience." Ted was aware of the opposition he would face for his peacemaking stand, yet he was true to his beliefs. In doing so, he remains an enduring force for peace.

Differentiated instruction is a nice idea, but what happens when it comes to assessing and grading students? What's both fair and leads to real student learning? Fair Isn't Always Equal answers that question and much more. Rick Wormeli offers the latest research and common sense thinking that teachers and administrators seek when it comes to assessment and grading in differentiated classes. Filled with real examples and "gray" areas that middle and high school educators will easily recognize, Rick tackles important and sometimes controversial assessment and grading issues constructively. The book covers high-level concepts, ranging from "rationale for differentiating assessment and grading" to "understanding mastery" as well as the nitty-gritty details of grading and assessment, such as: whether to incorporate effort, attendance, and behavior into academic grades; whether to grade homework; setting up grade books and report cards to reflect differentiated practices; principles of successful assessment; how to create useful and fair test questions, including how to grade such prompts efficiently; whether to allow students to re-do assessments for full credit. This thorough and practical guide also includes a special section for teacher leaders that explores ways to support colleagues as they move toward successful assessment and grading practices for differentiated classrooms.

When everything around you is going wrong, how far would you go to fit in? Isaac's sixth grade year gets off to a rough start. For one thing, a tornado tears the roof off the school cafeteria. His mother leaves on a two month business trip to China. And as always. . . . there's the itch. It comes out of nowhere.

Idiopathic, which means no one knows what causes it. It starts small, but it spreads, and soon--it's everywhere. It's everything. It's why everyone calls him Itch--everyone except his best friend Sydney, the only one in all of Ohio who's always on his side, ever since he moved here. He's doing the best he can to get along--until everything goes wrong in the middle of a lunch swap. When Sydney collapses and an ambulance is called, Itch

blames himself. And he's not the only one. When you have no friends at all, wouldn't you do anything--even something you know you shouldn't--to get them back? Drawing on her own experiences with idiopathic angioedema and food allergies, Polly Farquhar spins a tale of kids trying to balance the desire to be ordinary with the need to be authentic--allergies, itches, confusion and all. For everyone who's ever felt out of place, this debut novel set in the Ohio heartland is a warm, funny, and sometimes heartbreaking look at middle school misfits and misadventures. Whether you root for the Buckeyes or have no clue who they are, you'll be drawn into Itch's world immediately. This engaging debut is perfect for fans of *See You in the Cosmos* and *Fish in a Tree*.
