Growing up in the
shadow of Mount
Rushmore Lincoln
Borglum was a young boy
when his father, the great

sculptor Gutzon Borglum, suggested to a group of South Dakota businessmen that he should carve the faces of four presidents into a side of a mountain as an attraction for tourists. But Mount Rushmore would never be finished by Gutzon. It would be his son who would complete the fourteen-year task and present America with one of its most iconic symbols. Landslides occur in all geographic regions of the nation in response to a wide range of conditions and triggering processes that include storms, earthquakes, and human activities. Landslides in the United States result in an estimated average of 25 to 50 deaths annually and cost \$1 to 3 billion per year. In addition to direct losses, landslides also cause significant environmental damage and societal disruption. Partnerships for Reducing Landslide Risk reviews the U.S. Geological Survey's (USGS) National Landslide Hazards Mitigation Strategy, which was created in response to a congressional directive for a national approach to reducing

losses from landslides. Components of the strategy include basic research activities, improved public policy measures, and enhanced mitigation of landslides. This report commends the USGS for creating a national approach based on partnerships with federal, state, local, and non-governmental entities, and finds that the plan components are the essential elements of a national strategy. Partnerships for Reducing Landslide Risk recommends that the plan should promote the use of risk analysis techniques, and should play a vital role in evaluating methods, setting standards, and advancing procedures and guidelines for landslide hazard maps and assessments. This report

suggests that substantially increased funding will be required to implement a national landslide mitigation program, and that as part of a 10-year program the funding mix should transition from research and guideline development to partnership-based implementation of loss reduction measures.

How do school communities create environments that fully prepare both English learners and dual-language learners for colleges and careers? This valuable book profiles six high-performing high schools that had a singular focus on improving the educational outcomes of English learners. The authors use these case studies to identify a comprehensive set of design elements and shared values that were key factors in yielding extraordinary results. These include a school-wide language

development framework that integrates content, analytical practices, and language learning; a broad and dynamic view of assessment practices; intensive social-emotional support for students and their families; and mission-driven staff and leadership that maximize learning opportunities across classrooms. The practices employed in these schools are not only essential for English learners' success but, as the performance data shows, they also benefit all students. " This is my kind of change book: clear and deep; causes one to think; and inspires the reader to what may be possible on a wide scale. "

—From the foreword by Michael Fullan, professor emeritus,

University of Toronto " The schools featured in this set of beautifully drawn case studies reveal how they managed to beat the odds for their students—and there is much to learn by looking closely at what made them so effective. " —Lilly Wong Fillmore, professor, University of California, Berkeley " This book is a rich resource for all educators driven to ensure that all multilingual learners are ready for college and career. Now available in a revised and expanded edition, this accessible guide introduces

readers to the issues and controversies surrounding the education of language minority students in the United States. What makes this book a perennial favorite are the succinct descriptions of alternative practices for transforming our schools and students' futures, such as building on students' home languages and literacy practices, incorporating curricular and pedagogical innovations, using proven-effective approaches to parent engagement, and employing alternative assessment tools. The

authors have updated their bestseller to reflect recent shifts in policies, programs, and practices due to globalization and the changing economy; demographic trends; and new research on EL pedagogy. A totally new chapter highlights multimedia and multimodal instructional possibilities for engaging EL students. "This is the book that every educator in 21st-century USA should read. Few will not have students from other-than-English backgrounds at some point." —Patricia

Gándara, co-director, The Civil Rights Project at UCLA “The second edition of this important book is a must-read for researchers, policymakers, and practitioners interested in improving the education of minoritized emergent bilinguals.” —Nelson L. Flores, University of Pennsylvania “An excellent resource for policymakers, researchers, and educators who are interested in taking specific action to improve the education of English learners.” —Linguistics and Education (of first edition)

compartmentalized programs separate from academics, the truth is, all learning is social and emotional. What teachers say, the values we express, the materials and activities we choose, and the skills we prioritize all influence how students think, see themselves, and interact with content and with others. If you teach kids rather than standards, and if you want all kids to get what they need to thrive, Nancy Frey, Douglas Fisher, and Dominique Smith offer a solution: a comprehensive, five-part model of SEL that's easy to integrate into everyday content instruction, no matter what subject or grade level you teach. You'll learn the hows and whys of Building students' sense of identity and confidence in their ability to learn, overcome challenge, and influence the world around them. The debate is no longer whether to use information and communication technologies (ICT) in education in Africa but how to do so, and how to ensure equitable access for teachers and learners, whether in urban or rural settings. This is a book about how Africans adopt

and adapt ICT. It is also about how ICT shape African schools and classrooms. Why do we use ICT, or not? Do girls and boys use them in the same ways? How are teachers and students in primary and secondary schools in Africa using ICT in teaching and learning? How does the process transform relations among learners, educators and knowledge construction? This collection by 19 researchers from Africa, Europe, and North America, explores these questions from a

pedagogical perspective and specific socio-cultural contexts. Many of the contributors draw on learning theory and survey data from 36 schools, 66000 students and 3000 teachers. The book is rich in empirical detail on the perceived importance and appropriation of ICT in the development of education in Africa. It critically examines the potential for creative use of ICT to question habits, change mindsets, and deepen practice. The contributions are in both English and French.

A provocative new novel from bestselling author T.C. Boyle exploring the first scientific and recreational forays into LSD and its mind-altering possibilities. In this stirring and insightful novel, T.C. Boyle takes us back to the 1960s and to the early days of a drug whose effects have reverberated widely throughout our culture: LSD. In 1943, LSD is synthesized in Basel. Two decades later, a coterie of grad students at Harvard are gradually drawn into the

inner circle of renowned psychologist and psychedelic drug enthusiast Timothy Leary. Fitzhugh Loney, a psychology Ph.D. student and his wife, Joanie, become entranced by the drug's possibilities such that their "research" becomes less a matter of clinical trials and academic papers and instead turns into a free-wheeling exploration of mind expansion, group dynamics, and communal living. With his trademark humor and pathos, Boyle moves us through the Loneys' initiation at one of Leary's

parties to his notorious summer seminars in Zihuatanejo until the Loneys' eventual expulsion from Harvard and their introduction to a communal arrangement of thirty devotees—students, wives, and children—living together in a sixty-four room mansion and devoting themselves to all kinds of experimentation and questioning. Is LSD a belief system? Does it allow you to see God? Can the Loneys' marriage—or any marriage, for that matter—survive the chaotic and sometimes orgiastic use

of psychedelic drugs? Wry, witty, and wise, *Outside Looking In* is an ideal subject for this American master, and highlights Boyle's acrobatic prose, detailed plots, and big ideas. It's an utterly engaging and occasionally trippy look at the nature of reality, identity, and consciousness, as well as our seemingly infinite capacities for creativity, re-invention, and self-discovery.

The imperative that all students, including English learners (ELs), achieve high academic standards and have opportunities to participate in science, technology, engineering, and mathematics (STEM) learning has become even more urgent and complex given shifts in science and mathematics standards. As a group, these students are underrepresented in STEM fields in college and in the workforce at a time when the demand for workers and professionals in STEM fields is unmet and increasing.

However, English learners bring a wealth of resources to STEM learning, including knowledge and interest in STEM-related content that is born out of their experiences in their homes and communities, home languages, variation in discourse practices, and, in some cases, experiences with schooling in other countries. English Learners in STEM Subjects: Transforming Classrooms, Schools, and Lives examines the research on ELs' learning, teaching, and assessment in STEM

subjects and provides guidance on how to improve learning outcomes in STEM for these students. This report considers the complex social and academic use of language delineated in the new mathematics and science standards, the diversity of the population of ELs, and the integration of English as a second language instruction with core instructional programs in STEM.

When it's time for a game change, you need a guide to the new rules. Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices provides a play-by-play understanding of the practices strand of A

Framework for K–12 Science Education (Framework) and the Next Generation Science Standards (NGSS). Written in clear, nontechnical language, this book provides a wealth of real-world examples to show you what's different about practice-centered teaching and learning at all grade levels. The book addresses three important questions: 1. How will engaging students in science and engineering practices help improve science education? 2. What do the eight practices look like in the classroom? 3.

How can educators engage students in practices to bring the NGSS to life? Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices was developed for K–12 science teachers, curriculum developers, teacher educators, and administrators. Many of its authors contributed to the Framework’s initial vision and tested their ideas in actual science classrooms. If you want a fresh game plan to help students work together to generate and

revise knowledge—not just receive and repeat information—this book is for you.

If you sell physical products, warehousing and shipping costs can make or break your business. But most companies treat order fulfillment like an afterthought, running headlong toward a future in which they won't be able to compete with

marketplace giants. In *Adapt or Die*, Jeremy Bodenhamer paints a compelling picture of waste and lost profits, including case studies in which one wrong move in something as simple as packaging can send a company into the red. Fortunately, there's a better way. By embracing end-to-end automation, companies can ensure that every item sold is shipped quickly and efficiently, in the smallest possible package, through

the best-priced carrier, restoring critical savings to your bottom line. And you don't have to be Amazon to do it. ? Whether you're an e-commerce executive, retailer, manufacturer, or distributor, pick up *Adapt or Die* to learn how small to mid-sized businesses are taking on the five giants of the shipping industry-and winning.

Opening Doors Prentice Hall Contemporary Issues in Learning and Teaching looks at current issues across the three key areas of policy, learning and practice. It will

help you to think critically on your Education course, and to make connections between the processes of learning and the practicalities of teaching. The book addresses key issues in primary, secondary and special education, and includes examples from all four countries of the UK. The contributors reflect on current thinking and policy surrounding learning and teaching, and what it means to be a teacher today. Looking at the practice of teaching in a wider context allows you to explore some of the issues you will face, and the evolving expectations of your role in a policy-led environment. The book

focuses on core areas of debate including: - education across different contexts and settings - teaching in an inclusive environment - Continuing Professional Development (CPD) for practitioners Each chapter follows the same accessible format. They contain case studies and vignettes providing examples and scenarios for discussion; introduction and summary boxes listing key issues and concepts explored in the chapter; key questions for discussion reflection; and further reading.
