### **An Analysis of Texas Assessment of Knowledge and Skills (TAKS) Social Studies Questions with and Without Concept** Park Place Publications

Thirteen-year old McKay is a talented baseball player, but as equally untalented when it comes to algebra. If he doesn't bring his grade up, his parents threaten to make him quit the team. His best friend Tony thinks the natural solution is for McKay to befriend

Serena, a pretty girl in class, who also happens to get straight A's in algebra. Not only will that get McKay the tutor he desperately needs, but it will give Tony the chance to flirt with Serena's two best friends. Unfortunately, if McKay follows Tony's advice on how to "play the game," he might find himself in an even worse spot than when he was merely failing algebra. With a keen sense of wit, and more self-confidence than he gives himself credit for, McKay will keep readers alternately laughing and groaning as he is dragged kicking and screaming into the subtle (and often not so subtle) world of teen dating.

### **Teacher's Guide & Answer Key** Bookboon

The content area of social studies has not been given as much attention as its counterparts despite its inclusion in the state wide TAKS exam in Texas. All students in grades 8, 10, and 11 are required to take the social studies portion, and must pass it in order to graduate. The consequences of such a test and the importance of social studies in the everyday lives of students make this content area important. In addition, since ESL students constitute a considerable segment of the student population in our schools nowadays, it is essential that educators

understand the challenges these students face and the experiences they go through in such content areas and tests; thus, their performance in the TAKS exam is examined in this study. The purpose of this study was to analyze the performance of ESL students in the social studies TAKS exams in grades 8 and 11 in relation to content (represented by the five objectives of the test), and question item format (limited to two text-enriched question types: excerpt-based, and bullet-point questions). The study also sought to find the effects of demographic variables on student performance. The results of the study can further familiarize educators with the challenges ESL students face in social studies to be able to assist them succeed in their classrooms and on standardized tests. This study utilized secondary data analysis with a set of data provided from the Texas Education Agency. The data included information of the students who took the Spring 2003, 2006, and 2009 social studies TAKS exams, which allowed the researcher to conduct longitudinal analysis to further support the results. Overall, the study was non-experimental and descriptive in nature. A statistical significant difference was found between the percentages of correct answers by objective. ESL students performed better on objectives 3 (economics) and 5 (social studies skills), while lagging behind in objective 1 (history). The results were also confirmed in the longitudinal study

that showed that although ESL students' performance increased in all five objectives, there was statistically significant difference in the performance of ESL students among the objectives. In relation to question type, ESL students chose more correct answers for the bullet-point questions than they did for the excerpt-based questions with statistical significance. Longitudinal analysis of excerpt-based questions only showed that ESL students who took the exam in 11th grade three years after taking it in 8th grade, achieved higher. Finally, the results of the study show that the three demographic variables of gender, ethnicity, and socio-economic status had an effect on the performance of ESL students. Overall, males scored higher than females, economically non-disadvantaged students outperformed disadvantaged students, and Hispanic ESL students had the lowest scores of all the ethnic groups. The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969.1/149389> [DynaNotes Grade 8 Science TAKS Review Guide ABC-CLIO](#) Briefly traces the history of the doghouse, and shows a variety of doghouses created by architects and designers, including period reproductions, modern designs, and fantasy structures

**Teacher Created Materials**  
Measuring History complements the cases presented in *Wise Social Studies Practices* (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of *Measuring History* are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies

---

through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

understanding of patterns, relationships, and algebraic reasoning . Demonstrating an understanding of geometry and spatial reasoning . Demonstrating an understanding of the concepts and uses of measurement . Demonstrating an understanding of probability and statistics . Demonstrating an understanding of the mathematical processes and tools used in problem solving

**Texas TAKS Reading Grade 8** Teacher Created Materials

We are living in a conceptual world which we build through both informal and systematic interaction. Concepts enable us to simplify and organize our environment and communicate efficiently with others. The learning of concepts is represented by a general idea, usually expressed by a word, which represent a class or group of things or actions having certain characteristics in common, is a matter of central concern for designing effective instructional conditions in the school setting. Thus, concept attainment is a cornerstone of social studies to help students to make informed and reasonable decisions and therefore is a fundamental and challenging aspect of social studies content. Previous studies had not focused

specifically on concept questions and nonconcept questions. The purpose of this study is to determine whether 8th, 10th, and 11th grade students perform better on social studies questions which were classified as concept questions compared to questions which were classified as nonconcept questions. This study also attempts to identify the relationship between correct answers on concept questions and students' demographics. This study used a non-experimental descriptive, correlational, and causal-comparative research designs. This study used secondary data analysis, which involves a re-analysis of data collected for another study or purpose. The data for this study was gathered from Texas Education Agency, for all students who took the Spring 2006 and Spring 2009 version of the Grade 8, Grade 10, and Grade 11 Social Studies TAKS Tests. A statistical significant difference was found between the percentage of correct concept question and nonconcept questions. Students had higher achievement on nonconcept questions than concept questions. The researcher compared students' correct answers for concept questions between years, the result indicated that students

---

scored higher on concept questions in 2009 than 2006. Also, there was a significant difference between male students and female students. Male students had a higher mean of concept questions than female students. In addition, Grade 11 had a higher mean on concept questions than Grade 10 and Grade 8. The researcher found significant differences among ethnicity. Asian students and White students scored better on concept questions than other ethnic groups. The researcher also examined the correlation between concept questions and nonconcept questions. The result indicated that there was a significant positive high correlation between choosing correct answers for concept question and nonconcept questions. Last, native speaker students had a higher achievement on concept questions than ESL students.

Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of Give and Take). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated

information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep-spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In Deep Work, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, Deep Work takes the reader on a journey through memorable stories-from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air-and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. Deep Work is

an indispensable guide to anyone seeking focused success in a distracted world. An Amazon Best Book of 2016 Pick in Business & Leadership Wall Street Journal Business Bestseller A Business Book of the Week at 800-CEO-READ

**Barkitecture** Effortless Math Education [www.EffortlessMath.com](http://www.EffortlessMath.com) Teacher Education and Practice, a peer-refereed journal, is dedicated to the encouragement and the dissemination of research and scholarship related to professional education. The journal is concerned, in the broadest sense, with teacher preparation, practice and policy issues related to the teaching profession, as well as being concerned with learning in the school setting. The journal also serves as a forum for the exchange of diverse ideas and points of view within these purposes. As a forum, the journal offers a public space in which to critically examine current discourse and practice as well as engage in generative dialogue. Alternative forms of inquiry and representation are invited, and authors from a variety of backgrounds and diverse perspectives are encouraged to contribute. Teacher Education & Practice is published by Rowman & Littlefield.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-genius everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she’s learned from interviewing dozens of high

achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among *Grit*’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).
