The acceptance of volunteered geographic information (VGI) as a valued and useful source of information for governments is growing at all levels. Put simply, VGI is “crowdsourced” geographic information provided by a wide range of participants with varying levels of education, knowledge and skills (see Michael Goodchild’s writing for the original definition of the term). While a growing body of research demonstrates the reliability and accuracy of VGI when compared to official or government produced data sets, the progression towards their adoption and wider use is slow. There are a range of mechanisms and methods available for ensuring that crowdsourced information is fit for purpose so concerns about data quality are not the major reason for the lack of adoption. Instead, organizational practices, regulations and legal issues limit the rate of change. This report is based on a six-month study of the use of VGI by government and aims to provide a guide for the successful implementation of VGI.

Islamic counselling is a form of counselling which incorporates spirituality into the therapeutic process. Until now there has been little material available on the subject with no one agreed definition of Islamic counselling and what it involves. There has also been a rapidly growing population of Muslims in Western societies with a corresponding rise in need of psychological and counselling services. Islamic Counselling: An Introduction to theory and practice presents a basic

understanding of Islamic counselling for counsellors and Islamic counsellors, and provides an understanding of counselling approaches congruent with Islamic beliefs and practices from a faith-based perspective. The book is designed as an introduction for counsellors, its goal is to inform the reader about how the diverse roles of the Islamic counsellor fit together in a comprehensive way and to provide the guidelines that can be potentially integrated into a theoretical framework for use. The book is divided into two parts. Section one: Context and Background, and Section two: Assessment, Models and Intervention Strategies. Islamic Counselling encompasses both current theory, research and an awareness of the practice implications in delivering appropriate and effective counselling interventions with Muslim clients. It will be essential reading for both professionals and students alike.

A collection of case studies from nonwestern countries that offers an analysis of the significant role culture plays in crisis communication Culture and Crisis Communication presents an examination of how politics, culture, religion, and other social issues affect crisis communication and management in nonwestern countries. From intense human tragedy to the follies of the rich, the chapters examine how companies, organizations, news outlets, health organizations, technical experts, politicians, and local communities communicate in crisis situations. Taking a wider view than a single country’s perspective, the text contains a cross-cultural and cross-country approach. In addition, the case studies offer valuable lessons that organizations that wish to operate or are operating in those cultures can adopt in preparing and managing crises. The book highlights recent crisis events such as Syria’s civil war, missing Malaysia Flight MH370, and Japan’s Fukushima Daiichi nuclear power plant disaster. Each of the case studies examines how culture impacts communication and responses to crises. Authoritative, insightful, and instructive, this important resource: Analyzes how nonwestern cultures respond to crises Covers the role of culture in crisis communication in recent news events Includes contributions from 18 international authors who provide insight on nonwestern culture and crisis communication Written for communication professionals, academics, and students, Culture and Crisis Communication presents an insightful introduction to the topic of culture and crisis communication and then delves into illustrative case studies that explore intra-cultural and trans-boundary crisis communication.

On 17 July 2014 Malaysian Airlines Flight MH17 was shot down amid conflict in Ukraine, a crisis that led to a NATO-Russia standoff and the onset of a new period of East-West confrontation. This is the first scholarly work on the Ukrainian unrest and the tragic downing of MH17. It offers an analysis that challenges the Western consensus surrounding these events, emphasising the geopolitical and economic context of the West's standoff with Russia, the BRICS bloc, and the struggles over the EU's energy supply. Based on previously unpublished government and NATO documents as well as a wide array of sources this book offers an analysis of global political economy and contemporary debates about Russia and East-West relations.

'Outsourcing' – when will the horror stories stop coming? Every year the government gives private companies like G4S, Serco, Capita and ATOS £80 billion of taxpayers' money to handle some of our most sensitive and important services – but where is their transparency? Immigration is perhaps the most challenging and divisive issue of our time – so why has our government abdicated responsibility? As privatisation looms over an NHS in crisis, how do we hold these companies to account? Now, White speaks to campaigners, Whitehall insiders – and the companies themselves. Who Really Runs Britain? is a shocking compendium of what happens when outsourcing goes wrong – and what we do now.

This book addresses the interplay between the proportionality principle and EU digital law. Does EU digital law provide a fair balance of rights and interests? How does proportionality limit legislation in the digital economy? How can it be used to balance competing rights and interests? Diving into the dialectics of law and technology, the book analyses the relevance of the proportionality principle in regulating the digital world and as a vital tool for balancing competing rights and interests. The chapters analyse how conflicting rights and interests are resolved in EU digital law through the proportionality principle and critically reflect on its application. They scrutinise recent EU regulatory initiatives such as the GDPR, AI Act, Copyright Directive, DSA, and more. They reflect on the unique context of AI systems regulation, digital marketing, and data protection, illuminating the application and impact of proportionality in these arenas. Providing an in-depth examination of legal actors and real-life conflicts resolved by applying EU digital law, the book explains the pivotal role of the principle of proportionality in achieving an optimal balance of rights in our digital era.

Taking a global viewpoint, this volume addresses issues arising from recent developments in the enduring and topical debates over Genetically Modified Organisms (GMOs) and their relationship to Intellectual Property (IP). The work examines changing responses to the growing acceptance and prevalence of GMOs. Drawing together perspectives from several of the leading international scholars in this area, the contributions seek to break away from analysis of safety and regulation and examine the diversity of ways the law and GMOs have become entangled. This collection presents the start of a much broader engagement with GMOs and law. As GMO technology becomes increasingly more complex and embedded in our lives, this volume will be a useful resource in leading further discussion and debate about GMOs in academia, in government and among those working on future policy.
