International Sports Betting Taylor & Francis

Sports betting has become a truly global phenomenon, facilitated by new communication technologies. As a result, the development of deviances, from match-fixing to money laundering, has accelerated. This new reality has numerous implications, for both the regulation of this billion-dollar industry and the very integrity of sport, sport financing and betting operations. Written by an international team of academic researchers and industry professionals, *International Sports Betting* explores the central concepts of integrity and deviance, governance and policy, as well as perennial issues linked to the gambling sector, such as regulatory responsibilities and the fight against gambling addiction. Unlike other treatments of the gambling industry, the book offers a multi-disciplinary sociological and managerial critique that goes beyond a traditional focus on law and regulation. This is fascinating reading for any student, researcher or practitioner working in the areas of sport business, international business, international regulation, policy studies or gambling studies.

Current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25-30% of people over the age of 85 will show some degree of cognitive decline. Palliative care for older people: A public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that, as the global population ages, will ever more acutely shape the decisions of policy-makers and care-givers. The book begins by outlining the range of policies towards palliative care for older people that are found worldwide. It follows this by examining an array of socio-cultural issues and palliative care initiatives, from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients, and from the need to encourage compassion towards end-of-life care within communities to the development of care pathways for older people. Palliative care for older people: A public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world. The book also highlights the social-

cultural considerations that influence the difficult decisions that those involved in palliative care face, not least patients themselves, and offers examples of good practice and recommendations to inspire, support, and direct healthcare policy and decision-making at organisational, regional, national and international levels.

This volume examines the applicability of nature-based solutions in ecological restoration practice and in contemporary landscape architecture by bringing together ecology and architecture in the built environment. Green infrastructure is used to address urban challenges such as climate change adaptation, disaster risk reduction, and stormwater management. In addition, thermal comfort nature-based solutions reintroduce critical connections between natural and urban systems. In light of ongoing developments in sustainable urban development, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. The ten contributions to this book examine a wide range of successful cases of designing healthier, greener and more resilient landscapes in different geographical contexts, from the United States of America and Brazil, through various European regions, to Singapore and China. While some chapters attempt to conceptualize the interconnections between cities and

nature, others clearly have an empirical focus. Therefore, this volume provides a rich body of work and acts as a starting point for further studies on restoration of ecosystems and integrative policies such as the United Nations Sustainable Development Goals.

In Quebec and Scotland, questions of constitutional change, national identity, and national grievance play an important role in the electoral calculations of political parties and voters. Taking a strong stance on the national question can have strategic benefits both for parties pushing for greater autonomy and for those endorsing the status quo. In this in-depth look at issue voting, authors Éric Bélanger, Richard Nadeau, Ailsa Henderson, and Eve Hepburn examine how the national question affects political parties and voter behaviour in both substate nations. Through party manifestos, interviews with legislators, and opinion survey data, this book demonstrates that calls for constitutional change influence political debate, competition, voter choice, and the outcome of elections not only within Quebec and Scotland but also across Canada and the United Kingdom. Minority nationalist parties, the authors show, can gain support by claiming ownership of issues with widespread public agreement, such as self-determination and protecting the identity and interests of the nation. A comprehensive analysis of recent electoral politics, *The National Question and Electoral Politics in Quebec and Scotland* greatly enhances our understanding of the electoral impact of substate nationalism.

This book addresses contemporary debates on civil disobedience in Islam within the rich Sunni tradition, especially during the height of the non-violent people revolution in various Arab countries, popularly known as the Arab Spring. It illustrates the Islamic theological and jurisprudential arguments presented by those who either permit or prohibit acts of civil disobedience for the purpose of changing government, political systems or policy. The book analyses the nature of the debate and considers how a theological position on civil disobedience should be formulated in contemporary time, and makes the case for alternatives to violent political action such as jihadism, terrorism and armed rebellion.

A New York Times Bestseller! Ann Coulter is back, more fearless than ever. In *Adios, America* she touches the third rail in American politics, attacking the immigration issue head-on and flying in the face of La Raza, the Democrats, a media determined to cover up immigrants' crimes, churches that get paid by the government for their "charity," and greedy Republican businessmen and campaign consultants—all of whom are profiting handsomely from mass immigration that's tearing the country apart. Applying her trademark biting humor to the disaster that is U.S. immigration policy, Coulter proves that immigration is the most important issue facing America today.

This book examines the drivers of regionalism and integration in both Europe and Asia and seeks to forge comparative perspectives between the two regions. Comprising contributions from scholars, analysts and policymakers, this volume explores and debates how and why regional bodies such as the European Union (EU) and the Association of Southeast Asian Nations (ASEAN) are formed and sustained. Furthermore, it examines the drivers of, and impediments to, regionalism and integration. The debates regarding what and who constitute drivers are presented in a fresh, thematic and comprehensive manner. Leadership and core states are also critically examined, whilst material, ideational and normative factors are all assessed comparatively. Significantly, in light of the global financial crisis, the book considers the role of crisis as a driver of regionalism and integration. This book will be of interest to students, scholars and policymakers interested in Asian and European politics and comparative politics.

The bees are in terrible trouble. They need a good lawyer – one who is on their side. Once upon a time, there was a beautiful country called Oblivion. It had everything growing in it to make its people happy and healthy: raspberries, almonds, peaches, apricots, blueberries, cranberries, lavender, thyme, irises, roses, tulips, daffodils...the list seemed endless. But it did end, because some of the Thieves of Oblivion wanted to sell all of these wonderful things, and to force Nature to produce more and more and more of them. These Thieves, running a corporation called BearGenics, had a conflict of interest with Nature. They tampered with the genetics of crop plants. They never gave a thought to the fact that without honey bees, none of these plants would grow. The Thieves poisoned the plants, and in so doing, poisoned the honey bees. That's what happens when you leave the bear guarding the beehive. This story is a companion to *The Book of Thieves*, which describes the Banksters of Oblivion, and how they destroyed the financial security of that country.

Taking a global viewpoint, this volume addresses issues arising from recent developments in the enduring and topical debates over Genetically Modified Organisms (GMOs) and their relationship to Intellectual Property (IP). The work examines changing responses to the growing acceptance and prevalence of GMOs. Drawing together perspectives from several of the leading international scholars in this area, the contributions seek to break away from analysis of safety and regulation and examine the diversity of ways the law and GMOs have become entangled. This collection presents the start of a much broader engagement with GMOs and law. As GMO technology becomes increasingly more complex and embedded in our lives, this volume will be a useful resource in leading further discussion and debate about GMOs in academia, in government and among those working on future policy.

' Outsourcing ' – when will the horror stories stop coming? Every year the government gives private companies like G4S, Serco, Capita and ATOS £ 80 billion of taxpayers ' money to handle some of our most sensitive and important services – but where is their transparency? Immigration is perhaps the most challenging and divisive issue of our time – so why has our government abdicated responsibility? As privatisation looms over an NHS in crisis, how do we hold these companies to account? Now, White speaks to campaigners, Whitehall insiders – and the companies themselves. Who Really Runs Britain? is a shocking compendium of what happens when outsourcing goes wrong – and what we do now.

Nigeria is the most dynamic country on the African continent. Yet the legacy of colonialism, deep-rooted corruption, exposure to climate change and the proliferation of small arms have created a precarious security situation that holds back the country's potential for peace and prosperity. Security in Nigeria explores the many security threats facing Nigeria and assesses the government's responses to date. With contributors spanning three continents, it provides an original and comprehensive analysis of 'old' and 'new' security threats and offers original solutions to address the crisis.

As a holistic veterinarian and scientist, Dr. Gary Richter helps dog and cat owners to navigate the thicket of treatment options and separate the fact from the fiction. He wants us to use what actually works, not just what Western science or alternative medicine say "should" work. This multifaceted approach to health is known as integrative medicine. Dr. Richter examines traditional medicine from many cultures alongside modern medical techniques, describing the best of complementary care and the best of conventional veterinary medicine. Every treatment he recommends has the backing of scientific research or years of successful outcomes in his clinical practice. After explaining the treatment, he offers specific recommendations for an integrative approach to

common diseases, including allergies, skin conditions, diabetes, heart disease, and cancer. A holistic approach to health includes nutrition, as it sets up the foundation for your pet ' s health. Dr. Richter cuts through the hype in the pet-food world and explains how to choose the best commercial foods and supplements, and even includes both raw and cooked dog- and cat-food recipes for general diet as well as to treat specific needs. He also explains how we can use the right foods and supplements to "hack" the body ' s processes, including the immune system.

Since 2004, Thailand ' s southern border provinces have been plagued by violence. There are a wide array of explanations for this violence, from the revival of Malay nationalist movements and the influence from the global trend of radical Islam, to the power play among the regional underground crime syndicates, politicians, and state authorities. The disparate interpretations signal the dynamic and complex discursive contention of this damaging and enduring conflict, and this book looks at how this is played out in the Thai media, and with what possible consequences. In analysing the southern conflict coverage, the book presents the deficiencies in news coverage, as produced by four news organisations of different natures across a seven-year review period, and discusses the professional practices that hinder journalism from serving as a fair arena for healthy and rational democratic debates. Based on in-depth interviews with news workers, it argues that Thai journalism is not always monolithic and static, as shown in the discursive shifts in news content, the variations of journalistic practices and news workers ' disparate stances on the conflict. The book goes on to highlight the less immediately apparent difficulties of political conflict reporting, such as the subtle patterns of intimidation and media manipulation, as well as the challenges of countering socially-prevailing hegemonic beliefs in Thai society. Exploring the political contingencies and socio-cultural influences at play, this book provides an in-depth study of journalism ' s role in politics in Thailand, and is of interest to students and scholars of Southeast Asian Politics, Media Studies and Peace and Conflict Studies.
