Volume 1: Translations of the Bible take place in the midst of tension between politics, ideology and power. With the theological authority of the book as God ' s Word, not focusing on the process of translating is stating the obvious.

Inclinations, fluency and zeitgeist play as serious a role as translators ' person, faith and worldview, as do their vocabulary, poetics and linguistic capacity. History has seen countless retranslations of the Bible. What are the considerations according to which Biblical retranslations are being produced in current, 21st century, contexts? From retranslations of the Hebrew Bible to those of the Old and New Testaments, to mutual influences of Christian and Jewish translational traditions – the papers collected here all deal with the question of what is to be [re]gained with the production of

a new translation where, at times, many a previous one has already existed. Volume 2: Times are changing, and with them, the norms and notions of correctness. Despite a wide-spread belief that the Bible, as a “ sacred original, ” only allows one translation, if any, new translations are constantly produced and published for all kinds of audiences and purposes. The various paradigms marked by the theological, political, and historical correctness of the time, group, and identity and bound to certain ethics and axiomatic norms are reflected in almost every current translation project. Like its predecessor, the current volume brings together scholars working at the intersection of Translation Studies, Bible Studies, and Theology, all of which share a special point of interest concerning the status of the Scriptures as texts fundamentally based on the act of translation and its recurring character. It aims to breathe new life into Bible translation studies, unlock new perspectives and vistas of the field, and present a bigger picture of how Bible [re]translation works in society today.

The volume contains a selection of papers, both theoretical and empirical, from the European Society for Translation Studies (EST) Congress held in Copenhagen in September 2001. The EST Congresses, held every three years in a different country, reflect current ideas, theories and studies covering the whole range of "Translation", both oral and written, and the papers collected here, authored by both experienced and young translation scholars, provide an up-to-date picture of some concerns in the field. Topics covered include translation universals, linguistic approaches to translation, translation strategies, quality and assessment issues, screen translation, the translation of humor, terminological issues, translation and related professions, translation and ideology, language brokering by children, Robert Schumann's relation to translation, directionality in translation and interpreting, community interpreting in Italy, issues in interpreting for refugees, notes in consecutive interpreting, interpreting prosody, and frequent weaknesses in translation papers in the context of the editorial process.
