8 Ways of Being, How to Motivate Yourself to Live Happy and Free Every Day Dales Large Print Books

"Stranded in a Snowstorm" is a thrilling extreme sports, action adventure chapter book for kids 7-12 that teaches lessons of green living and survival. It takes the reader through a harrowing backpacking trip that puts 12 year old Nico, his baby sitter and friend Hannah, and their mountaineering rescuer Paul to the test as an unexpected snowstorm strands them in the middle of the woods in Colorado's Rocky Mountains. While they are stuck out there in the wilderness, they learn important things about survival, their surroundings, themselves and the Earth they inhabit. The story highlights how lucky we are to have water flow freely through our faucets at home, the unexpected merits of misbehaving, how important attitude is in survival (and otherwise), and how the greatest tool we have at our disposal is our mind.

Soy and its coproducts are rapidly emerging as one of the most prominent sustainable plastics of the 21st century. The relative abundance of soy and its functional and thermoplastic properties, low cost, and biodegradable characteristics have made it a material of great interest for widespread use in the plastics industry. As most of the functional properties of the final products are directly related to the physico-chemical properties of the raw material, a detailed knowledge of the inherent characteristics of soy-based materials is essential for understanding and manipulating their properties for better end-user applications. This book summarises in a most comprehensive manner the recent technical research accomplishments in the area of soy-based bioplastics. The prime aim and focus of this book is to present recent advances in the processing and applications of soy-based biopolymers as potential bioplastics. It reflects recent theoretical advances and experimental results, and opens new avenues for researchers as well as readers working in the field of plastics and sustainable materials. The different topics covered in this book include: structural analysis of soy-based materials; soy/biopolymer blends; films, fibres, foams, and composites; and different advanced applications. In addition, several critical issues and suggestions for future work are comprehensively discussed in the hope that the book will provide a deep insight into the state of the art of soy-based bioplastics. The book is unique, with contributions from leading experts in the bioplastics research area,

and is a useful reference for scientists, academics, research scholars, and technologists.

Safe Passage: Astronaut Care for Exploration Missions sets forth a vision for space medicine as it applies to deep space voyage. As space

missions increase in duration from months to years and extend well beyond Earth's orbit, so will the attendant risks of working in these extreme and isolated environmental conditions. Hazards to astronaut health range from greater radiation exposure and loss of bone and muscle density to intensified psychological stress from living with others in a confined space. Going beyond the body of biomedical research, the report examines existing space medicine clinical and behavioral research and health care data and the policies attendant to them. It describes why not enough is known today about the dangers of prolonged travel to enable humans to venture into deep space in a safe and sane manner. The report makes a number of recommendations concerning NASA's structure for clinical and behavioral research, on the need for a comprehensive astronaut health care system and on an approach to communicating health and safety risks to astronauts, their families, and the public.
