Filmalized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's

fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

"Kung delivers a touching story enriched by its strong atmosphere," Publishers Weekly, Starred Review "There's much to admire in Kung's debut: vivid Hong Kong backgrounds, a sharp eye for conflicts of class and nationality, and the looming threat to the heroine's family," Kirkus Reviews "Kung finds a key plot element in the hidden lives of the thousands of Filipinas who come to Hong Kong as servants for affluent families and live almost like slaves," The Washington Post "It would be easy to assume that Hong Kong is populated solely by spies and incredibly rich people who made their fortunes off the backs of peasants. What distinguishes this book is a compelling sense of place. This is a Hong Kong readers don't come across very often and the author brings the city alive. It's an unusual debut," Chris Petrakos, The Chicago Tribune "This unusual Far East mystery is as notable for its portrayal of Hong Kong while being returned to Communist China as it is for its intimate study of maternal love. Kung proves an expert storyteller, adroitly probing Claire's psyche, imparting the Far East wisdom she gets from her close friend, a Scottish priest and above all, the maturation under stress of Claire's lover and father of her son. The reader will discover the summoning of a poignant, almost visceral, response to the plight of Kung's besieged principals," Buffalo Evening News, Ed Kelly Foreign correspondent Claire Raymond finds herself uncomfortably sidelined at home on maternity leave. A neighbor's son, Petey, is found dead along the Midlevel district's May Road during the Christmas season only six months before the official handover of Hong Kong from Britain to China. A neurotic anxiety pervades the colonial middle-class and mixes with a mounting religious hysteria among the mistreated Filipina amahs, the housekeepers who slave for Chinese and colonial households. Claire fears for the safety of her own newborn, Caspar. The visit to Hong Kong of Xavier's ex-lover Fabienne adds to her tensions as she investigates Petey's suspicious death.

Metal matrix composites are making tangible inroads into the "real" world of engineering. They are used in engineering components such as brake rotors, aircraft parts, combustion engines, and heat sinks for electronic systems. Yet, outside a relatively limited circle of specialists, these materials are mostly unknown. Designers do not as a rule think of using these materials, in part because access to information is difficult as these materials have not really entered engineering handbooks. *Metal Matrix Composites in Industry* is thus useful to engineers who wish to gain introductory knowledge of these materials and who want to know where "to find" them. Additionally, it provides researchers and academics with a survey of current industrial activity in this area of technology.
