Civil architecture and structural engineering may be subjects to which most of us never give a second thought, but both these disciplines are crucial to the built environment in which we live, and without the skills of those who work in them, our buildings and infrastructure would lack the safety and reliability that we all take for granted. This book presents the proceedings of ICCASE 2023, the 7th International Conference on Civil Architecture and Structural Engineering, held in Guangzhou, China, from 14 - 16 April 2023 as a virtual event, and attended by around 250 international participants. The aim of the conference was to discuss recent advances and new perspectives in civil architecture and structural engineering, and to gain insight into the current state of the field and future scenarios. A total of 190 submissions were received for the conference, of which 78 were accepted for presentation after peer review. These are divided into 4 sections: civil construction and underground structure analysis; underground space and special structure engineering; construction material quality and performance research; and structural seismic design and reinforcement engineering. Topics covered included high-rise buildings and large-span structures; the monitoring and control of structures, tunnels and underground structures; calculation principles of the seismic design of structures; and seismic isolation technology of structures, among others. The book offers a comprehensive overview of civil architecture and structural engineering today, and will be of interest to all those working in the field.

IJER Vol 27-N3 Routledge

You are the CEO of My Wealth, Inc. — so Take Charge! Wealth Management Unwrapped provides you with the tools and tips you need to take back control and more effectively manage your money. Wall Street veteran Charlotte Beyer conducts a tour of the wealth management industry, guiding you through the complexities and jargon with straightforward, no-nonsense expertise. From choosing an advisor and understanding the fine print, to fulfilling your responsibilities as CEO of My Wealth, Inc. this book offers all-in-one guidance for anyone ready to take charge of their finances. This revised and expanded version has been updated with NEW information, for women investors who seek the best advisor, older investors who confront investment choices, and a discussion on both robo-advisors and the impact of your wealth on your children. The companion website includes new interactive diagnostics to help you get started, assess your progress and then see how you compare to others who face similar challenges. By stripping away industry tech-speak and the all-too-common self-promotion, you will: Understand the difference between advisor and money manager Learn the best questions to ask when interviewing an advisor Dissect fee disclosure statements and conflicts of interest Find out if you might be a do-it-yourself investor and learn why that might make sense for your personality The wealth management industry has undergone massive change over the past 25 years. New services or products spring up, yet impenetrable language and marketing hype leave you with precious little practical information. In two or three hours of reading made easier thanks to the bold, often amusing illustrations, you will be a far smarter investor, not by learning the jargon but by applying common sense and insisting on clearer communications from your advisor. You and your advisor can create an even stronger and long lasting partnership by reading this book together. Wealth Management Unwrapped is like a powerful GPS, whether you're a novice or sophisticated investor, offering you a much clearer view of how to fully realize the dreams and goals your wealth now affords you.

Implementing EU Mobility Partnerships Springer

How Latino activists brought down powerful Arizona sheriff Joe Arpaio Journalists Terry Greene Sterling and Jude Joffe-Block spent years chronicling the human consequences of Sheriff Joe Arpaio's relentless immigration enforcement in Maricopa County, Arizona. In *Driving While Brown*, they tell the tale of two opposing movements that redefined Arizona's political landscape—the restrictionist cause embraced by Arpaio and the Latino-led resistance that rose up against it. The story follows Arpaio, his supporters, and his adversaries, including Lydia Guzman, who gathered evidence for a racial-profiling lawsuit that took surprising turns. Guzman joined a coalition determined to stop Arpaio, reform unconstitutional policing, and fight for Latino civil rights. *Driving While Brown* details Arpaio's transformation—from "America's Toughest Sheriff," who forced inmates to wear pink underwear, into the nation's most feared immigration enforcer who ended up receiving President Donald Trump's first pardon. The authors immerse readers in the lives of people on both sides of the battle and uncover the deep roots of the Trump administration's immigration policies. The result of tireless investigative reporting, this powerful book provides critical insights into effective resistance to institutionalized racism and the community organizing that helped transform Arizona from a conservative stronghold into a battleground state.

A former U.S. Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation, Kim R. Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite—illiberalism—abandoning the precepts of open-mindedness and respect for individual rights, liberties, and the rule of law upon which the country was founded, and becoming instead an intolerant, rigidly dogmatic ideology that abhors dissent and stifles free speech. Tracing the new illiberalism historically to the radical Enlightenment, a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding, Holmes argues that today's liberalism has forsaken its American roots, incorporating instead the authoritarian, anti-clerical, and anti-capitalist prejudices of the radical and largely European Left. The result is a closing of the American liberal mind. Where once freedom of speech and expression were sacrosanct, today liberalism employs speech codes, trigger warnings, boycotts, and shaming rituals to stifle freedom of thought, expression, and action. It is no longer appropriate to call it liberalism at all, but illiberalism—a set of ideas in politics, government, and popular culture that increasingly reflects authoritarian and even anti-democratic values, and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process. Although illiberalism has always been a temptation for American liberals, lurking in the radical fringes of the Left, it is today the dominant ideology of progressive liberal circles. This makes it a new danger not only to the once venerable tradition of liberalism, but to the American nation itself, which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties.

ECPA 2020 Christian Book Award Finalist! You wouldn't believe it, but . . . James Earl Jones, the voice of Darth Vader, grew up mute. Michael Jordan was cut from his high school basketball team. Albert Einstein was bullied mercilessly in school. Beethoven's mom almost aborted him. Life takes the strangest sharp turns—and sometimes, U-turns. Robert Peterson—popular speaker, storyteller, and author—has been a student for his entire life of what God is teaching us through those real-life U-turns. In this book, he compiles 365 amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey. With *The One Year Book of Amazing Stories*, you'll marvel at how God has used the lives of these ordinary people to change the course of human history.

This book provides a comprehensive assessment of the effectiveness of Mobility Partnerships and their consequences for third countries. Mobility partnerships between the EU and third countries are usually viewed as reflecting asymmetric power relations where development aid, trade relations and visa policies are made conditional upon the cooperation by third countries with an EU agenda of migration control. This book argues that three main factors condition the relevance of Mobility Partnerships: the state of relations between EU Member States and a third country, and in particular, the role of postcolonial ties; the power of negotiation of a third country, which is linked to its geopolitical importance for the EU; and its administrative capacity, which is understood as the capacity of a state to define and implement policies and to legislate and enforce the law. The work combines a comparative legal analysis of the development of the legal and policy frameworks in the cases of Morocco and Cape Verde with an empirical study of the implementation of Mobility Partnerships' projects. The analysis demonstrates that Mobility Partnerships, despite their non-binding nature, have legal and policy relevance for these third countries with regard to the regulation of migration, asylum, human trafficking and even labour law. As such, this book makes a contribution to the understanding of the interplay between the interests of EU, Member State and third country actors in the implementation of the Mobility Partnerships. The book will be a key resource for academics and students focusing on Migration Law, EU Studies, Geopolitics and African Studies. The empirical approach will also appeal to policy-makers, international organisation representatives and NGOs.

Advances in Frontier Research on Engineering Structures Oxford University Press

Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

The Real Thing is the first official biography of Ian McTaggart Cowan (1910–2010), the “father of

Canadian ecology.” Authorized by his family and with the research support and participation of the University of Victoria Libraries, Briony Penn provides an unprecedented and accessible window into the story of this remarkable naturalist. From his formative years roaming the mountains around Vancouver looking for venison to his last years finishing the voluminous and authoritative *Birds of British Columbia*, Cowan’s life provides a unique perspective on a century of environmental change—with a critical message for the future. As the head and founder of the first university-based wildlife department in Canada, Ian McTaggart Cowan revolutionized the way North Americans understood the natural world, and students flocked into his classrooms to hear his brilliant, entertaining lectures regarding the new science of ecology. His television programs in the 1950s and ’60s, *Fur and Feathers*, *The Web of Life* and *The Living Sea*, made him a household name around the world. He was also responsible for hiring a young David Suzuki, who followed in his nature-show-host footsteps. Illustrated throughout with colour and black-and-white photos from all aspects of Cowan’s life, *The Real Thing* takes the reader on an adventurous and inspirational journey through the heart of North American ecology, wilderness, landscape and wonder.

With the ongoing evolution of the digital society challenging the boundaries of the law, new questions are arising – and new answers being given – even now, almost three decades on from the digital revolution. Written by a panel of legal specialists and edited by experts on EU Internet law, this book provides an overview of the most recent developments affecting the European Internet legal framework, specifically focusing on four current debates. Firstly, it discusses the changes in online copyright law, especially after the enactment of the new directive on the single digital market. Secondly, it analyzes the increasing significance of artificial intelligence in our daily life. The book then addresses emerging issues in EU digital law, exploring out of the box approaches in Internet law. It also presents the last cyber-criminality law trends (offenses, international instrument, behaviors), and discusses the evolution of personal data protection. Lastly, it evaluates the degree of consumer and corporate protection in the digital environment, demonstrating that now, more than ever, EU Internet law is based on a combination of copyright, civil, administrative, criminal, commercial and banking laws.

Introduced in 2008, the UN Convention on the Rights of Persons with Disabilities has existed for nearly a decade. This comprehensive study examines how courts in thirteen different jurisdictions make use of the Convention. The first sustained comparative international law analysis of the CRPD, Waddington and Lawsons ground breaking text illuminates the intersection between human rights law, disability law and international law through an examination of the role of courts. The first part of the book contains chapters specific to each jurisdiction. The second part consists of comparative chapters which draw on the rich analysis of the jurisdiction-specific chapters. These chapters reflect on emerging patterns of judicial usage and interpretation of the CRPD and on the wider implications for human rights theory and the nascent field of international comparative human rights law. This volume is a vital and thought-provoking addition to the literature on comparative international law and disability rights.

European Judicial Responses to Security Council Resolutions Disha Publications

This book examines the challenges posed to contemporary international law by the shifting role of the border, which has recently re-emerged as a central issue in international relations. It posits that borders do not merely correspond to States’ boundaries: indeed, while remaining a fundamental tool for asserting States’ power, they are in fact a collection of constantly changing spatial limits. Consequently, the book approaches borders as context-specific limits and revisits notions traditionally linked to them (jurisdiction, sovereignty, responsibility, individual rights), while also adopting the innovative approach of viewing borders as phenomena of both closedness and openness. Accordingly, the first part of the book addresses what happens “within” borders, investigating the root causes of the emergence of spatial limits and re-assessing apparent extra-territorial assertions of State power. In turn, the second part not only explores typical borderless spaces, but also more generally considers the exercise of States’ and international organisations’ powers and prerogatives across or “beyond” borders.

Borders, Legal Spaces and Territories in Contemporary International Law BRILL

Handbook of Forensic Mental Health Services focuses on assessment, treatment, and policy issues regarding juveniles and adults in the criminal and civil systems. Uniquely, this volume is designed for professionals who deliver mental health services, rather than researchers. Just like its parent series, its goal revolves around improving the quality of mental health care services in forensic settings. It achieves this by integrating the findings related to clinical practice, administration, and policy from trends and best practice internationally that mental health professionals can implement.

The appearance in July 1915 of the Fokker E I heralded a reign of terror over the Western Front that the Allies called the 'Fokker Scourge'. The French Nieuport 11 was one type desperately thrown into action to counter the Fokkers. The swirling dogfights between this fighter – and its more powerful but more unwieldy stablemate, the Nieuport 16 – and a succession of improved Fokkers, the E II, E III and E IV, came to symbolise air combat in World War I. This book gives a detailed look at the developmental history of the fighters, contrasting the interrupter gear-equipped Fokker with the more improvised solution incorporated in the Nieuport – a machine gun fitted to the upper wing to avoid the propeller entirely. The Germans went on to abandon the monoplane in favour of a new and deadly generation of biplane fighters, based on the lessons learned from these vicious engagements and influenced by the success of the French Nieuport.

Mathematics 16th Edition Oxford University Press

Principles & Practice in EU Sports Law provides an overview of EU Sports Law. In particular it assesses sporting bodies' claims for legal autonomy from the 'ordinary law' of states and international organisations. Sporting bodies insist on using their expertise to create a set of globally applicable rules which should not be deviated from irrespective of the territory on which they are applied. The application of the *lex sportiva*, which refers to the conventions that define a sport's operation, is analysed, as well as how this is used in claims for sporting autonomy. The *lex sportiva* may generate conflicts with a state or international institution such as the European Union, and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain. Stephen Weatherill's text underlines the tense relationship between *lex sportiva* and national and regional jurisdictions which is exemplified with specific focus on the EU. The development of EU sports law and its controversies are detailed, reinforced by the example of relevant legal principles in the context of the practice of sports law. The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy, and the comparison between different jurisdictions and sports is evident. Furthermore the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special, and in turn how (far) its special character should be granted legal recognition.
